Professor Hannah McGee is a health psychologist and founding Director of the Health Services Research Centre at the Royal College of Surgeons in Ireland. Professor McGee’s research interests are in cardiovascular disease (in particular cardiac rehabilitation), quality of life assessment, factors influencing healthcare access and ageing. She is past president of the European Health Psychology Society and former Nucleus/Board member of the Working Group on Cardiac Rehabilitation & Exercise Physiology of the European Society of Cardiology (ESC). Her publications in the area of cardiac rehabilitation include work on guidelines, on selection of quality of life assessment tools and on gender and age influences on service uptake. Ongoing work includes coordinating the development of a minimum dataset for cardiac rehabilitation service evaluation in Ireland and, with Professors Neil Oldridge and Hugo Saner, a multi-language multicentre study to develop a cardiac-related quality of life instrument for Europe (HeartQoL). She is president-elect of the Cardiac Rehabilitation Section of EACPR.
