INTRODUCTION AND WELCOME

Dear Students,

We would like to welcome you to Thessaloniki in Greece and to the University of Macedonia. Congratulations on succeeding in securing a place at the BSc in Accounting and Finance!

The undergraduate programme Greek-speaking programme in Accounting and Finance offered by the Department, has been successfully running for over 30 years and it is considered as one of the top degrees offered in Accounting and Finance in Greece. Similarly, the postgraduate programmes offered are very competitive and in high demand. Contributing factors to this success includes the high-profile collaborations with well-established accrediting organizations, its external links with the mark, very high absorption rates for its graduates as well as the fact that it consistently attracts students of high ability.

We are therefore committed to maintain the same high level of quality for the BSc in Accounting and Finance. The experienced staff of the programme will ensure that you become a well-rounded professional with a skillset of the highest standards. This also means that we will be expecting the best from you and we will be looking forward to help you develop your professionalism. Commitment and patience are probably the virtues you should mostly practice to achieve your goals while studying for the BSc in Accounting and Finance. The years to follow may be challenging but they will also be rewarding. It is of high importance to be as productive as you can and we strongly recommend that you engage with all available academic activities. We also encourage you to broaden your horizons and boost your creativity by joining a society, or by expanding your skills through training programmes and self-development.

Throughout your journey, apart from the support you will receive from the academic and non-academic staff of the Department, you will also realize that the University offers a variety of services. You can use the online and onsite facilities of the Library¹, you can consult with the Career Office² about your vocational concerns and professional development, you can express your interest in finding short-term employment at the Internship Office³, or you can

network with the University graduates through the Alumni Office\(^4\). You can even exercise and follow classes at the University gym, or even reach out to the Student Counselling and Support Centre\(^5\) if you find yourself in a situation where you need to talk to someone.

This Handbook provides a brief overview of the main features of the programme given that most information is available in detail at the programme website\(^6\). In short, this is a 4-year programme comprising of 40 modules, which leads to the award of a BSc in Accounting and Finance, after the successful accumulation of 240 ECTS units. Every semester maintains a balance between Accounting and Finance modules, while modules of general knowledge related to quantitative methods, economics, or general business are also offered. The modules have been carefully selected to reflect the curriculum requirements from most accrediting institutions, such as ACCA, CFA, ICAEW, IIC and CIMA, among others, as well as, to capture the recent trends in the science and practice of Accounting and Finance. We have a good record in securing significant exemptions toward professional accreditations and we expect that these will be also available for this programme as well.

We strongly believe that you will enjoy the quality of life that Greece in general and Thessaloniki in particular has to offer. Apart from the fact that Greece is famous for offering top food quality and great nightlife, you will also have the opportunity to visit places of cultural importance, historic significance and natural beauty, which will all add up to an exceptional university experience.

We wish you all the best for your new journey and we are looking forward to help you materialize your aspirations.

*The Program Director*

*The Academic Staff of the Department*

*The Administrative and Technical Staff of the Department*
THE UNIVERSITY OF MACEDONIA

The University of Macedonia was founded in 1948 as the Graduate School of Industrial Studies of Thessaloniki and it received its current name in 1990. With over 60 years in operation, the University currently attracts 14,584 undergraduate students and 4,003 postgraduate and PhD students. Being traditionally a Business School, the University of Macedonia is well-known for the quality of studies in subjects related to Economics and Business.

The University has four Schools:

- School of Economic and Regional Studies
  - Department of Economics
  - Department of Slavic and Eastern Studies
- School of Business Administration
  - Department of Business Administration
  - Department of Accounting and Finance
- School of Information Sciences
  - Department of Applied Informatics
- School of Social Sciences, Humanities and Arts
  - Department of International and European Studies
  - Department of Educational and Social Policy
  - Department of Music Science and Art

There is a wealth of resources to be found at the website of the University. We recommend that you carefully study the website content as it will provide you with great guidance about the electronic services of the university, the Open eClass learning platform, which is the main mode of document-sharing, announcements and coursework submissions, Students Web where you can see your marks, enrolment status and request certificates, and so on. You might also find helpful the 360 virtual tour of the University and the Department of Accounting and Finance which also includes floorplans to help you navigate the premises. All these resources will help you adjust faster to student life at the University of Macedonia.

8 https://www.uom.gr/en/about/network-telematic-services
10 https://services.uom.gr/unistudent/login.asp?lang=en-us
The term dates of the university for 2023-2024 are announced at the University’s website, while a list of important dates can also be found at the Study in Greece portal\textsuperscript{12} which is part of the Greek Ministry of Education and Religious Affairs.

We note briefly a few details on the semester dates and bank holidays, since they may differ compared to your home country:

- Christmas holidays roughly begin a week before the Christmas day (December 25th) and end on the first working day after January 6th which is a Greek Orthodox bank holiday.
- Easter Holiday begins a week before the Greek Orthodox Easter Sunday and ends about a week later.
- Labour day is celebrated on May 1st.
- There are two national holidays celebrated on October 28th and March 25th.
- There is a Greek Orthodox holiday celebrated on a variable date, usually in June (for 2024 it is on June 24th).
- Finally, October 26th is a local holiday in Thessaloniki, celebrating Saint Demetrius.

The postal address of the university is: University of Macedonia, Egnatia 156, 54636, Thessaloniki, Greece.

The official website of the university is https://www.uom.gr/en.

To contact the university via phone (landline) you need to dial the country code 0030 followed by 2310891101 (i.e. 00302310891101).

\textsuperscript{12} https://studyinggreece.edu.gr/why-greece/education-in-greece/academic-calendar/.
Mission Statement
The mission of the Department, according to the founding presidential decree, is “to promote and disseminate knowledge through research and teaching in the scientific field of Accounting and Finance and to train top executives who can meet the needs of businesses and organizations of the private and Public Sector”.

Brief History
The Department of Accounting and Finance was founded in 1990 along with the University of Macedonia. Over the years it has grown in size, reaching currently an annual intake of about 300 undergraduate students and approximately 200 postgraduate students. The first of the three MSc programmes of the Department was created in 2004, while the other two followed in 2008 and 2009. Over the last decade, the Department has received accreditations for its programmes from ACCA, ICAEW, IIA, IIC and CIMA, and it has signed MoUs with international universities, as well as, private and public organizations. Currently, the Department prides to have an excellent graduate absorption rate and a growing network of alumni.

Academic Staff
The academic staff of the department is responsible for your teaching and learning, as well as the design and delivery of your educational experience. Each module is led by an academic member of staff who is usually the person delivering the module. You may contact academic staff via email or visit/call them during their Office Hours which will be published in due course.

PROGRAMME GENERAL INFORMATION

Admissions
The programme is offered to foreign students who have attended the last two years of high school in a foreign country and not in Greece. They must hold a high school diploma or an International Baccalaureate, have proof of sufficient English language proficiency and be successful at the interview. The standards of admission are determined by the programme committee and they may vary according to the applications received. The programme committee will take into consideration the grades of the candidate throughout the equivalent of high school, the level of English language, as well as, the performance of the candidate during an interview with the selection panel. According to the regulations, the minimum requirement to accept a student to the programme is to have an overall performance that would allow admittance to Higher Education in their home country, as well as, good command of the English language. However, entry standards are expected to be higher to ensure that

---

students have the required level of background knowledge to successfully complete their studies.

**Language**
The language of the Programme is English and students are expected to provide proof of adequate command of the language, while it is not required for student who reside in countries where the official language is English or who have successfully completed in the past an undergraduate or postgraduate English-speaking programme.

**Required documentation**
The documents that candidates must submit in English are:
- Passport
- Paper or electronic application form
- Detailed curriculum vitae
- Corresponding title of the high school diploma or International Baccalaureate (with official translation of the original document)
- An officially translated grade transcript for the last two years high school, accompanied with a confirmation that the overall high school mark ensures access to higher education in the country of origin.
- Proof of knowledge of the English language as described above
- Evidence of professional experience (if any)
- Proof of payment of the application fee
- Additional documentation to support the candidate's application, such as admission results from a university in his/her country or an undergraduate/postgraduate university title, seminars, scholarships, etc.

**Study Mode – Delivery Structure - Duration**
- This is a full time programme of study.
- The modules are delivered on a 13-week semester basis.
- The BSc in Accounting and Finance is a 4-year programme. Students who fail to complete their studies in four years will be granted with an extension of up to 4 more years. After the end of the 8th academic year, students will be automatically unregistered from the course. Exemptions will be considered by the programme committee if there are valid extenuating circumstances.
Attendance
You are expected to attend timetabled sessions for each module, while your participation during class is also essential to achieve the learning outcomes. There is very close correlation between those students who are poor attendees and those who fail to progress at the end of the year. It's a fact that those who attend regularly give themselves a much higher chance of success. We expect you to approach your studies in a professional manner. Moreover, procedures are in place to monitor attendance throughout the year and extended absence from teaching sessions or assessments, may lead to actions taken, especially if you are studying under a Student Visa.

Awarded Degree
Students who successfully complete the course will receive a BSc in Accounting and Finance, equivalent to the Greek equivalent “Ptychion” («Πτυχίο»). The degree is officially recognised by the Hellenic National Academic Recognition and Information Center (NARIC)\textsuperscript{14}, commonly known in Greece as DOATAP, from the respective Greek acronym. This means that your degree is recognised for all legal purposes in Greece and the European Union and provides you the opportunity to seek employment in the European Union.

ECTS Units
Each module corresponds to 6 European Credit Transfer and Accumulation System (ECTS) and each semester has a total of 30 ECTS units. Upon successful completion of the programme, you will have accumulated 240 ECTS units.

Rationale for the Programme
The Programme has been designed to reflect the recent developments in the education and practice of Accounting and Finance Sciences, while taking into account the new technologies and the market needs. The modules have a rich content which, apart from being modern, covers the majority of requirements for the most sought-after accreditations, such as ACCA, CFA, ICAEW, IIA, IIC or CIMA, which the Department wishes to secure for the BSc in Accounting and Finance.

\textsuperscript{14}. https://www.doatap.gr/home_english/.

---

10
Prospects of Employment
After successfully graduating, you will be able to apply for a wide range of potential employments. You will have the knowledge, skills and competences to be employed in:

- The financial services sector in commercial and investment banks, hedge funds, real estate investment trusts, financial companies, insurance companies, and management consulting firms.
- The public sector as accountants, auditors, analysts and evaluators of investment plans.
- Any type of entity that needs accounting organization and management.
- Any business that requires budget preparation and planning, preparation and analysis of financial plans, financial projections, financial statement analysis, risk management.

Assessment Policy and Progression
The pass rate for a module and the overall pass rate for the BSc is five on a scale from 0 to 10. Analytically, the marking scale is as follows:

- 8.51 – 10.00: Excellent
- 6.51 – 8.50: Very Good
- 5.00 – 6.50: Good
- < 5.00: Fail

If a student receives an overall excellent performance, then on the awarded degree it will state “Excellent”.

The pass rate for a module is five. If the assessment structure includes multiple elements, the module instructor will determine whether students should achieve an overall pass mark of 5 across elements, or a minimum mark to be set for individual elements. If a student fails to pass a module, she or he will have the opportunity for a repeat assessment during the resit assessment period of the following September. The nature of the repeat assessment will be shared to students by the course instructor. If a student fails again at the repeat assessment, they will be asked to repeat the module along with any financial implications that this may have.

Disabilities and Assessments
If you have a disability or require special arrangements during assessments, you need to inform the Secretariat of the Department in written form, attaching documentation translated into English from a certified translator where your condition or diagnosis is confirmed by a healthcare professional (signed and stamped). The Secretariat will inform module instructors about your condition.
and, where necessary, modified assessment provisions will be made. Strict confidentiality will be observed with regards to your sensitive data.

**PROGRAMME CONTENT**

**Previous Knowledge**
While the required concepts will be introduced in each module and guidance to catch up will be provided where necessary, we expect students to have a fundamental understanding of calculus. No previous knowledge of economics or managerial sciences is required.

**Learning Outcomes**
After successful completion of the BSc in Accounting and Finance, students will be able to:

- Apply costing principles in order to calculate the costs of product and services, prepare budgets and make successful managerial decisions.
- Analyze financial statements of companies (entities) and estimate their value by applying appropriate valuation techniques.
- Appreciate the function of internal and external control, as well as, the company's internal auditing measures and management control systems.
- Engage with complex business taxation issues.
- Implement concepts related to financial management and capital budgeting and be able to consult on issues of corporate finance, such as dividend policy, capital structure, working capital management and risk management.
- Explain the functioning of international money and capital markets and explain how they affect economic policy and business decisions.
- Engage with concepts related to the pricing and behaviour of financial products.
- Explain the main portfolio management theories and implement portfolio management techniques.
- Apply quantitative methodologies in the context of accounting and finance.
- Use technologies in the context of accounting and finance.
- Appreciate the importance of business ethics and ESG (Environment – Society – Governance) principles in conduct of business.
- Prepare and present a well-research report or brief on a certain deadline.
- Engage in literature search and research on topics rooted in the science of Accounting and Finance.
• Exhibit professionalism and apply professional skills in a professional environment.

Module Selection
To achieve its aims, the Department has included in the Programme a variety of modules such as:

• Modules that build the necessary background for the graduate in the files of: business administration, quantitative methods, economics, information systems, law
  a. Modules of specialization in Accounting and Finance.
  b. Modules that require laboratory training.
  c. Modules that require engagement with research in the recent trends of the scientific literature.

Regarding the relevance of non-accounting and non-financial modules in the curriculum, the purpose of the BSc in Accounting and Finance is not only to establish scientific knowledge but to turn its students into successful all-rounded professionals. The Accounting and Finance modules form a solid basis, but it is necessary to complement them with analytical skills, critical ability, awareness of the economic and business environment, team-working, leadership, ability to conduct research and deliver a written report, to name but a few.

Moreover, applied quantitative modules are included in the curriculum. The incorporation of such modules is equip graduates with the necessary skills required by modern organizations. The automation of accounting and finance processes and the increasing use of business analytics by private and public organizations provides an additional justification for the inclusion of such modules. Ultimately, students with exposure to quantitative modules and computer programming have greater chances in developing analytical and critical thinking.

Similarly, economics modules are necessary for financial analysts to evaluate the trends of the economy which affect project and business valuations. Business modules help developing a fundamental understanding of how firms are organized and how they take into account their complex external environment and develop strategies stemming from their internal environment. Law is necessary in Accounting and Finance since a great part of graduates’ professional lives includes interpreting and implementing accounting and financial law.
The education design of the BSc in Accounting and Finance also enables graduates to develop important skills and are exhibit: management and organization skills, willingness to adopt and drive change, and effective teamwork, leadership.

Programme Outline
The programme includes 38 core modules as well as a dissertation double module during the final year.

Work Placement
Students will have the opportunity to carry out a Work Placement in the public or private sector in Greece or abroad, according to the Regulations of the University of Macedonia and the current legal framework, provided that all legal requirements are met as per the Greek Legislation. Specifically, during the fourth year of studies or earlier, students will have the opportunity to do an internship of a predetermined duration at an institution or company of their choice. Special care is taken to accommodate for students with disabilities who have the right to carry out an internship on an equal basis with any other student.

Student mobility
Students of the BSc will have the opportunity, if all legal requirements are met as per the Greek Law, to attend and successfully be assessed in modules of a foreign university (host institution), under the framework of mutual university agreements or exchange programmes, such as the Erasmus Plus programme. Students will be credited with the ECTS units of the module they were assessed in the host institution. Students will need to ensure that the module at the host institution has at least as many ECTS units as the respective one at the home institution.

Research Project
During the last year of your studies, you will be required to conduct a research project. In this two-semester course, you will be required to either undertake a research project on a topic of your choice or deliver an industrial dissertation in collaboration with a firm of your choice, provided that certain legal conditions are met. Typically, in the first semester, students who conduct research dissertations will be expected to prepare a research proposal, which includes a review of the literature. Similarly, students who conduct industrial dissertations should pick a firm and identify a key issue that required to be dealt with and come up with a detailed plan. In the second semester, students will complete their dissertation, building on their proposals. Throughout the dissertation, students will be assigned with a supervisor to provide guidance and advice.
STUDENT MATTERS

Study in Greece Website
Acknowledging the fact that studying abroad can be stressful, the Greek Ministry of Education and Religious Affairs created Study in Greece\(^\text{15}\). Study in Greece offers free services to international students and can be extremely helpful with international student matters. It should be your companion throughout your studies as you will be able to find useful information at the website before your arrival and during your stay. Moreover, you can contact Study in Greece with any issues that you may have through the Help Desk facility found on the website. Much of the information provided below (accommodation, student ID, cost of living etc) is also discussed in detail at the portal.

Student Visa and International Student Matters
If you are an international student outside the European Union, then you will need to apply for Student Visa. We strongly recommend that you contact Study in Greece to receive detailed guidance on this issue.

Academic ID
One of the first things you need to do when you arrive at the University of Macedonia is to apply for an Academic ID. You will find all relevant information in: https://www.uom.gr/en/academic-id.

Cost of Living
Thessaloniki is the second largest city in Greece and maintains reasonable prices relative to other cities. The exact cost of living can vary significantly depending on your lifestyle, as well as, whether you decide to share accommodation or not and the location of the accommodation. A useful calculator for the cost of living in Thessaloniki can be found in the following link: https://www.numbeo.com/cost-of-living/in/Thessaloniki.

Catering
Eating in Thessaloniki is not costly. Preparing a meal with ingredients bought from a supermarket or the various farmers markets that operate on a daily basis in the city, can significantly drop the cost of food. Also, the restaurant at the ground floor of the University of Macedonia currently operates under the

\(^{15}\) https://studyinggreece.edu.gr/
management of a private catering service, where you can buy a full meal with salad and dessert at a very reasonable price.

**Accommodation**
There are various sites in Greece that can be used while searching for accommodation. Most of the listings at these sites are from real estate agents and home owners. In any case, you will be asked for a deposit, which is usually a month’s rent and which you will receive back at the end of the lease. You can also check the real estate agents’ websites because some of the listings may vary.

The rent of a flat will be a function of various characteristics such as the state of the flat, the location and a few other factors, a single bedroom flat or studio of reasonable quality. You may also consider sharing accommodation which will significantly reduce the cost of living. A few private student residences also operate in Thessaloniki and you are also welcome to explore these choices too.

**Healthcare**
Students from EU countries should issue a European Health Card in advance of their studies, which will ensure that they will receive the same access to healthcare as a Greek citizen. International students from other countries than EU should make their own arrangements for health insurance for the duration of their studies to ensure that they will have access to healthcare. Study in Greece will be able to provide guidance on this matter.

**Library and Resources**
The University maintains an extensive collection of Accounting and Finance books, journals and resources in its Library. Through its website, students can search for resources necessary for studying or browse the databases that the University subscribes to in order to prepare a research project or a report. You will also find information about the book loan policies and the procedures followed as well as other useful material such as guides, information about referencing, plagiarism and so on.

**Personal Tutor**
A personal tutor will be assigned to you, who will be able to provide guidance on academic matters or issues of prospective employment and further studies. While you should contact your module instructor for module-specific questions

---

or queries, the personal tutor may be able to offer advice about self-study approaches or on broadening your skills.

**University Services for Students**
There is a wealth of services offered by the University of Macedonia, so please browse the website to see what may be useful or of interest to you. For your convenience, some of these services are listed below:
- Student Welfare Department
- Career Office
- Internship Office
- Student Counselling and Support Centre
- Physical Education Office
- UoM Alumni Office

**Student Rights and Obligations**
Students of the BSc have the same rights and obligations as all students of the University of Macedonia. Specifically, students are entitled to the right of freedom of opinion, of providing feedback for the quality of teaching and of other services provided to them, of using the facilities of the institution, of access to social benefits, of representation, of participation in student associations and University activities, of the right of request / application and objection, of meeting with lecturers and personal tutors, as well as of accessing feedback on their grades. Similarly, students are required to be aware of and observe the rules and regulations governing the institution and each of its facilities and services, to respect all members of the university community, to maintain order and cleanliness in areas of the campus, to be mindful of all facilities and equipment of the institution, to observe safety rules, to refrain from using the University's premises and facilities for legitimate purposes, as well as to cooperate with the University authorities and the University community in preventing illegal activity or in preventing actions that may damage the reputation University.

**ACADEMIC OFFENCES**

The University of Macedonia takes academic offences very seriously and it is your responsibility to ensure that you understand what they entail. Committing an academic offence may jeopardise your studies or even your career. If you are unsure what comprises an academic offence, you may consult an academic member of staff, your personal tutor, who may also be able to direct you to
relevant sources. In the context of academic fairness and plagiarism, academic
offences are actions undertaken by a student, which could confer an unfair
advantage in any type of assessment. Academic offences are reported to the
programme committee and a decision will be made on disciplinary sanctions.
Depending on the severity of the confirmed offences, students may have
assessments nullified and asked to repeat a module, may be penalised with a
halt of their studies for a semester or more, or they may be ultimately withdrawn
from the course. Note that academic offences usually need to be declared upon
registration with a professional body, while the University may also be required
to share this information too.

Candidates with proven academic offences are not eligible for any refunds of
tuition fees in the case the programme committee decides to disrupt their
studies at any point. It is also important to note, that if an academic offence is
confirmed, this will appear on the candidate’s student records.

Whether a case is considered an academic offence or not, as well as, the
severity of the offence, will be judged by the programme committee. An
indicative list, though includes the following:
a. Copying or paraphrasing of other people’s work or ideas into a submitted
assessment without appropriate referencing (plagiarism).
b. Misconduct during official examinations (copying, having study material near
the desk when not authorized to do so, unauthorized use of laptops or mobile
phones, not observing the rules of the examination process, disrespecting
the examiners).
c. Making false declarations about a disability, a condition or illness in an
attempt to obtain either modified assessment provisions or extenuating
circumstances.
d. Manipulating research data or results with an intend to achieve a favourable
outcome.
e. Having another person undertake any form of assessment for you or,
equivalently, if you undertake any form of assessment for another student.
f. Any other activity which could confer an unfair advantage to any
candidate(s).

(2) SHORT DESCRIPTION

The course provides an introduction to financial accounting concepts. It describes the accounting system and accounting cycle, as well as, the use of accounting entries in order to recognize an economic event. Moreover, the course describes the preparation of financial statements and the qualitative characteristics of accounting information. Case studies will be used to support learning.

(3) LEARNING OUTCOMES

<table>
<thead>
<tr>
<th>Learning Outcomes</th>
<th>The learning outcomes of the course are described, the specific knowledge, as well as the skills and abilities that students will acquire after the successful completion of the course at the appropriate level. Consult Appendix A</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Description of the Level of Learning Outcomes for each study cycle according to the European Higher Education Area Qualifications Framework (QF-EHEA)</td>
</tr>
<tr>
<td></td>
<td>Descriptors of Levels 6, 7 &amp; 8 of the European Qualifications Framework for Lifelong Learning and Annex B Summary Guide for writing Learning Outcomes</td>
</tr>
</tbody>
</table>

After successful completion of the course, students will be able to:

1. Use accounting entries to present economic events.
2. Use the ledger to examine the balances of each account.
3. Prepare financial statements.
4. Analyze and interpret financial statements.

**General Competencies**

Taking into consideration the general competences that the degree-holder must acquire (as these appear in the Diploma Supplement and appear below), chose the ones that the course is aiming at.

- Search for, analysis and synthesis of data and information, with the use of the necessary technology: Project planning and management
- Adapting to new situations: Respect for the natural environment
- Decision-making: Showing social, professional and ethical responsibility and sensitivity to gender issues
- Working independently: Criticism and self-criticism
- Team work: Production of free, creative and inductive thinking
- Working in an international environment: Others
- Working in an interdisciplinary environment: Production of new research ideas

Students are expected to acquire the following general competencies:

- Work as part of a team.
- Use accounting information for decision-making.
- Work independently.
- Use accounting judgement to form business decisions.

**Module Outline**

The indicative module outline is as follows:

- Introduction to Financial Accounting.
- Conceptual Framework.
- Economic Events, Accounting Entries and the Accounting Journal.
- Type of accounts and the Accounting Ledger.
- Type of accounting entries during the year.
- The Accounting Cycle.
- Trial Balance and Adjusting Entries.
- Adjusted Balance and closing accounting entries.

**Teaching and Learning Methods - Assessment**

**Delivery Mode**

- Face-to-face, Distance Learning.

**Use of Information and Communications Technology**

- Use of ICT in teaching, laboratory education, communication with students.
- Communication and content sharing via Open E-Class
- Use of general software (e.g. Microsoft Office suite)

**Teaching**

The way and methods of teaching are described in detail.

- Lectures, Seminars, Laboratory Exercise, Field Exercise, Bibliography Study & Analysis

**Activity**

**Semester Workload**

<table>

ASSESSMENT

Description of the assessment process

Assessment Language, Assessment Methods, Formative or Summative, Multiple Choice Test, Short Answer Questions, Essay Development Questions, Problem Solving, Written Assignment, Report/Report, Oral Examination, Public Presentation, Laboratory Paper, Clinical Patient Examination, Artistic Interpretation, Other/Other

Explicitly defined assessment criteria and if and where they are accessible by students are mentioned.

The module assessment language is in English and students are expected to exhibit the required level of proficiency.

The assessment of the course consists of:
- Mid-term exam (30%)
- Final examination (70%)

The evaluation criteria across modes of assessment include the following:
- Demonstration of key knowledge related to the content of course
- Demonstration of an ability to apply the knowledge in a given problem or case study
- Critical ability evident in applying appropriate methods/knowledge in a given case and/or developing theory-based and literature based arguments.
- Structure and presentation
- Use of English language

More detailed assessment criteria will be provided to you in the module handbook document or posted on the course webpage, if deemed necessary.

(2) **SHORT DESCRIPTION**

The course aims for students to develop an understanding of the basic principles of finance and the basic concepts needed to understand the financial manager’s decision-making process. In particular, students will learn about the objectives, the fundamentals of financial ratio analysis while they will examine how to best allocate capital in order to create value. Case studies will be used to support learning.

(3) **LEARNING OUTCOMES**

**Learning Outcomes**

The learning outcomes of the course are described, the specific knowledge, as well as the skills and abilities that students will acquire after the successful completion of the course at the appropriate level.

Consult Appendix A

- Description of the Level of Learning Outcomes for each study cycle according to the European Higher Education Area Qualifications Framework (QF-EHEA)
- Descriptors of Levels 6, 7 & 8 of the European Qualifications Framework for Lifelong Learning and Annex B
- Summary Guide for writing Learning Outcomes

After successful completion of the course, students will be able to:

1. Understand the basic concepts of financial system and financial institutions.
2. Acknowledge the role of financial manager in making investing and financing decisions.
3. Understand and apply the time value of money in order to make investment decisions.
4. Calculate a comprehensive set of financial ratios and use them to evaluate the financial health of a company.
5. Evaluate the relationship between risk and return in equity investments.
6. Apply critical thinking skills to attempt to apply lessons learned to financial situations that will be encountered.

**General Competencies**

Taking into consideration the general competences that the degree-holder must acquire (as these appear in the Diploma Supplement and appear below), chose the ones that the course is aiming at.

| Search for, analysis and synthesis of data and information, with the use of the necessary technology | Project planning and management |
| Adapting to new situations | Respect for the natural environment |
| Decision-making | Sensitivity to gender issues |
| Working independently | Criticism and self-criticism |
| Team work | Production of free, creative and inductive thinking |
| Working in an international environment | Others |
| Working in an interdisciplinary environment | Production of new research ideas |

- Students are expected to acquire the following general competencies:
  - Critical thinking and problem solving. Our students will have critical thinking and problem solving skills applicable to business and management practice or issues.
  - Teamwork. Our graduates will be effective team participants.
  - Promotion of free, creative and inductive thinking.
  - Communication. Our students will produce oral presentations that communicate complex disciplinary ideas and information effectively for the intended audience and purpose.

(4) **MODULE OUTLINE**

The indicative module outline is as follows:

- Introduction to financial system
- The role of financial manager
- The time value of money
  - Present Value
  - Future Value
  - Annuities
  - Perpetuities
- Interest Rates
- Equities
  - Types
  - The dividend growth model
  - The Efficient Market Hypothesis: Theory and Evidence
- Risk and return
  - Diversification and the market portfolio
  - Stock indices
  - Fundamentals of CAPM
- Financial analysis techniques
  - Ratios
  - Common-Size Analysis
- The use of Graphs as an Analytical Tool
(5) TEACHING AND LEARNING METHODS - ASSESSMENT

DELIVERY MODE
Face-to-face, Distance Learning

USE OF INFORMATION AND COMMUNICATIONS TECHNOLOGY
Use of ICT in teaching, laboratory education, communication with students

(2) SHORT DESCRIPTION

This module provides an introduction to mathematics relevant for students in accounting and finance. On completion of the module students will have competence in linear equations, simultaneous equations, nonlinear equations, differentiation, optimization, vectors and matrices. Case studies will be used to support learning.

(3) LEARNING OUTCOMES

Learning Outcomes
The learning outcomes of the course are described, the specific knowledge, as well as the skills and abilities that students will acquire after the successful completion of the course at the appropriate level. Consult Appendix A:
- Description of the Level of Learning Outcomes for each study cycle according to the European Higher Education Area Qualifications Framework (QF-EHEA)
- Descriptors of Levels 6, 7 & 8 of the European Qualifications Framework for Lifelong Learning and Annex B Summary Guide for writing Learning Outcomes

After successful completion of the course, students will be able to:
1. Apply concepts of linear algebra in a given case
2. Engage with concepts related to algebraic operations
3. Apply principles of mathematical optimization
4. Use quantitative skills to solve a given economic problem.

General Competencies
Taking into consideration the general competences that the degree-holder must acquire (as these appear in the Diploma Supplement and appear below), chose the ones that the course is aiming at.
Search for, analysis and synthesis of data and information, with the use of the necessary technology
Adapting to new situations
Decision-making
Working independently
Team work
Working in an international environment
Working in an interdisciplinary environment
Production of new research ideas

- Demonstrate adequate self-management, learning, communication, and problem-solving skills
- Decision-making
- Working independently

### (4) MODULE OUTLINE

The indicative module outline is as follows:
- Linear, non-linear and simultaneous equations
- Differentiation
- Vector operations
- Matrix algebra operations (addition, subtraction, scalar multiplication, multiplication, transposition, inversion)
- Matrix definiteness and convexity
- Multivariate functions
- Optimization

### (5) TEACHING AND LEARNING METHODS - ASSESSMENT

#### DELIVERY MODE

Face-to-face, Distance Learning

#### USE OF INFORMATION AND COMMUNICATIONS TECHNOLOGY

Use of ICT in teaching, laboratory education, communication with students

(2) SHORT DESCRIPTION

This module provides students with an understanding of the principles and analytical methods of microeconomics to examine the behaviour of households and firms. It aims to provide the microeconomic theory necessary for intermediate and other economics and finance modules, as well as enable students to understand and apply economic theory to policy issues. Case studies will be used to support learning.

(3) LEARNING OUTCOMES

Learning Outcomes
The learning outcomes of the course are described, the specific knowledge, as well as the skills and abilities that students will acquire after the successful completion of the course at the appropriate level.

Consult Appendix A
- Description of the Level of Learning Outcomes for each study cycle according to the European Higher Education Area Qualifications Framework (QF-EHEA)
- Descriptors of Levels 6, 7 & 8 of the European Qualifications Framework for Lifelong Learning and Annex B
- Summary Guide for writing Learning Outcomes

After successful completion of the course, students will be able to:
1. Recognise the nature of the basic economic problem of optimal resource allocation
2. Understand the behaviour of consumer and producer in the market economy
3. Understand the implications of different market structures for optimal resource allocation
4. Recognise the consequences of and potential constraints for the implementation of government intervention

**General Competencies**

Taking into consideration the general competences that the degree-holder must acquire (as these appear in the Diploma Supplement and appear below), choose the ones that the course is aiming at.

| Search for, analysis and synthesis of data and technology | Respect for difference and multiculturalism |
| Adapting to new situations | Respect for the natural environment |
| Decision-making | Showing social, professional and ethical responsibility and sensitivity to gender issues |
| Working independently | Criticism and self-criticism |
| Team work | Production of free, creative and inductive thinking |

Adapted to an international environment: Others

Working in an interdisciplinary environment: Production of new research ideas

Students are expected to acquire the following general competencies:

- Employ a range of resources to evaluate explanations in microeconomics
- Demonstrate adequate self-management, learning, communication, and problem-solving skills
- Decision-making
- Working independently

(4) **MODULE OUTLINE**

The indicative module outline is as follows:

- Demand and supply
- Elasticity
- Consumer choice
- Firms, production and costs
- Competitive firms and markets
- Monopoly
- Oligopoly
- Monopolistic competition
- Interventions in markets

COURSE WEBPAGE

Please visit https://openeclass.uom.gr/

(2) SHORT DESCRIPTION

Management Information Systems is a formal discipline within business education that bridges the gap between computer science and well-known business disciplines such as finance, marketing, and management. This course exposes the student to current theories and practices appropriate for understanding the role and application of information systems for individuals, organizations, and society within a globally competitive context. The course focuses on information technology and its uses in improving work practices, products, and tools for individuals and organizations. In this course, students will learn about the components of management information systems and how to leverage them in business. Case studies will be used to support learning.

(3) LEARNING OUTCOMES

Learning Outcomes

The learning outcomes of the course are described, the specific knowledge, as well as the skills and abilities that students will acquire after the successful completion of the course at the appropriate level.

Consult Appendix A

- Description of the Level of Learning Outcomes for each study cycle according to the European Higher Education Area Qualifications Framework (QF-EHEA)
- Descriptors of Levels 6, 7 & 8 of the European Qualifications Framework for Lifelong Learning and Annex B
- Summary Guide for writing Learning Outcomes

After successful completion of the course, students will be able to:

1. Describe the use and function of management information systems
2. Explain the strategic value of information systems in the organization
3. Store and retrieve data by using databases
4. Analyze and design the informational model of various information systems
5. Develop small-scale information systems using Microsoft Access
6. Identify trends in information systems that will impact the next generation of business.

General Competencies
Taking into consideration the general competences that the degree-holder must acquire (as these appear in the Diploma Supplement and appear below), chose the ones that the course is aiming at.

- Search for, analysis and synthesis of data and information, with the use of the necessary technology
- Adapting to new situations
- Decision-making
- Working independently
- Team work
- Working in an international environment
- Working in an interdisciplinary environment
- Production of new research ideas

Students are expected to acquire the following general competencies
- Search for, analysis and synthesis of data and information, with the use of the necessary technology
- Adapting to new situations
- Decision-making

(4) MODULE OUTLINE
The indicative module outline is as follows:

- Introduction to Management Information Systems
- MIS Basics – Hardware, Software, Networking, and Security

ASSESSMENT

Description of the assessment process
Assessment Language, Assessment Methods, Formative or Summative, Multiple Choice Test, Short Answer Questions, Essay Development Questions, Problem Solving, Written Assignment, Report/Report, Oral Examination, Public Presentation, Laboratory Paper, Clinical Patient Examination, Artistic Interpretation, Other/Other
Explicitly defined assessment criteria and if and where they are accessible by students are mentioned.

The module assessment language is in English and students are expected to exhibit the required level of proficiency.

The assessment of the course consists of:
- Mid-term exam (20% - multiple choice test)
- Final examination (80% - problem solving)

The evaluation criteria across modes of assessment include the following:
- Demonstration of key knowledge related to the content of course
- Demonstration of an ability to apply the knowledge in a given problem or case study
- Critical ability evident in applying appropriate methods/knowledge in a given case and/or developing theory-based and literature-based arguments.
- Structure and presentation
- Use of English language

More detailed assessment criteria will be provided to you in the module handbook document or posted on the course webpage, if deemed necessary.

(2) SHORT DESCRIPTION

This course provides the accounting treatment procedures regarding items of the Statements of Financial Position as well as, Income Statement. In this respect, it describes the initial recognition and subsequent accounting treatment of assets, liabilities and equity components. Moreover, it describes the accounting rules regarding the recognition of revenues, gains, expenses and losses. Case studies will be used to support learning.

(3) LEARNING OUTCOMES

Learning Outcomes
The learning outcomes of the course are described, the specific knowledge, as well as the skills and abilities that students will acquire after the successful completion of the course at the appropriate level.
Consult Appendix A

- Description of the Level of Learning Outcomes for each study cycle according to the European Higher Education Area Qualifications Framework (QF-EHEA)
- Descriptors of Levels 6, 7 & 8 of the European Qualifications Framework for Lifelong Learning and Annex B
- Summary Guide for writing Learning Outcomes

After successful completion of the course, students will be able to:
3. Use judgement to choose accounting policies and accounting estimates.
4. Use depreciation methods and analyze the effects of the choice of depreciation methods on financial statements.

**General Competencies**

Taking into consideration the general competences that the degree-holder must acquire (as these appear in the Diploma Supplement and appear below), choose the ones that the course is aiming at.

- Search for, analysis and synthesis of data and information, with the use of the necessary technology: Project planning and management, Respect for the natural environment
- Adapting to new situations: Showing social, professional and ethical responsibility and sensitivity to gender issues
- Decision-making: Criticism and self-criticism
- Working independently: Production of free, creative and inductive thinking
- Team work: Others
- Working in an international environment: Respect for difference and multiculturalism
- Working in an interdisciplinary environment: Production of new research ideas

Students are expected to acquire the following general competencies:

- Work as part of a team.
- Use accounting information for decision-making.
- Work independently.
- Use accounting judgement to form business decisions.

(4) **MODULE OUTLINE**

The indicative module outline is as follows:

- Categories of Assets, Liabilities, Equity, Revenues and Expenses.
- Accounting policies and correction of prior period errors.
- Accounting estimates.
- Accounting for Fixed Assets.
- Accounting for Intangible Assets.
- Accounting for Inventories.
- Accounting for Accounts Receivable.
- Accounting for short-term Investments.
- Accounting for long-term Investments.
- Accounting for short-term Liabilities.
- Accounting for long-term Liabilities.
- Accounting for Equity.
- Accounting for Revenues, Expenses, Gains and Losses.

(5) **TEACHING AND LEARNING METHODS - ASSESSMENT**

(2) SHORT DESCRIPTION

Good financial decision making is key to the success of any business. This course
aims to cover the basic building blocks of financial management that are of primary
cconcern to corporate managers, and all the considerations needed to make financial
decisions both inside and outside firms. Students will also get the opportunity to apply
these concepts to contemporary business situations. The course will discuss a range
of topics relevant to valuation of investments, the relationship between risk and return,
the role of debt and equity as well as capital budgeting and project evaluation
techniques. We will conclude with a brief introduction to international financial
management. By the end of the course students will have a good understanding of
factors and frameworks to consider in making good investment and financing
decisions. Case studies will be used to support learning.

(3) LEARNING OUTCOMES

Learning Outcomes

The learning outcomes of the course are described, the specific knowledge, as well as the skills and abilities that
students will acquire after the successful completion of the course at the appropriate level.

Consult Appendix A

- Description of the Level of Learning Outcomes for each study cycle according to the European Higher
  Education Area Qualifications Framework (QF-EHEA)
- Descriptors of Levels 6, 7 & 8 of the European Qualifications Framework for Lifelong Learning and Annex B
After successful completion of the course, students will be able to:

1. Describe how different financial markets function.
2. Describe and assess how companies manage long and short-term financing.
3. Estimate the value of different financial instruments such as stocks and bonds.
4. Make capital budgeting decisions under both certainty and uncertainty.
5. Integrate subject matter studied on related modules and to demonstrate the multidisciplinary aspect of practical financial management problems.

General Competencies

Taking into consideration the general competences that the degree-holder must acquire (as these appear in the Diploma Supplement and appear below), choose the ones that the course is aiming at.

| Search for, analysis and synthesis of data and information, with the use of the necessary technology | Project planning and management |
| Adapting to new situations | Respect for difference and multiculturalism |
| Decision-making | Respect for the natural environment |
| Working independently | Showing social, professional and ethical responsibility and sensitivity to gender issues |
| Team work | Criticism and self-criticism |
| Working in an international environment | Production of free, creative and inductive thinking |
| Working in an interdisciplinary environment | Others |
| Production of new research ideas | |

Students are expected to acquire the following general competencies:

- Evaluate possible actions, solutions and strategies for financial decision making.
- Actively seek, evaluate, and, when appropriate, incorporate feedback
- Promotion of free, creative and inductive thinking.
- Objectively critique findings of fellow students through the use of case studies.

(4) MODULE OUTLINE

The indicative module outline is as follows:

- The financial management function
- Sources of financing
- Valuing bonds
- The value of common stocks
- Capital Budgeting: Net Present Value (NPV) and the Internal Rate of Return (IRR)
- Risk and project appraisal
- Capital rationing, taxation and inflation
- International financial management

(2) SHORT DESCRIPTION

This module is designed to provide an introductory overview to macroeconomics. Among the topics covered are unemployment, inflation, long- and short-run macroeconomic models, fiscal policy, monetary policy and the role of central banks, exchange rate policy and government debt. The module involves the analysis of theoretical macroeconomic models and the examination of economic events. Case studies will be used to support learning.

(3) LEARNING OUTCOMES

Learning Outcomes
The learning outcomes of the course are described, the specific knowledge, as well as the skills and abilities that students will acquire after the successful completion of the course at the appropriate level. Consult Appendix A
- Description of the Level of Learning Outcomes for each study cycle according to the European Higher Education Area Qualifications Framework (QF-EHEA)
- Descriptors of Levels 6, 7 & 8 of the European Qualifications Framework for Lifelong Learning and Annex B
- Summary Guide for writing Learning Outcomes

After successful completion of the course, students will be able to:
1. Understand central theoretical developments in macroeconomics
2. Apply theoretical understanding to the analysis of key policy questions within macroeconomics
3. Understand the role of key assumptions in structuring a variety of long- and short-run macroeconomic models and determining their conclusions.
4. Assess the impact of macroeconomic shocks and institutions in determining key economic variables in a variety of models.

**General Competencies**

Taking into consideration the general competences that the degree-holder must acquire (as these appear in the Diploma Supplement and appear below), chose the ones that the course is aiming at:

- Search for, analysis and synthesis of data and information, with the use of the necessary technology
- Adapting to new situations
- Decision-making
- Working independently
- Team work
- Working in an international environment
- Working in an interdisciplinary environment
- Production of research ideas
- Project planning and management
- Respecting difference and multiculturalism
- Respect for the natural environment
- Showing social, professional and ethical responsibility and sensitivity to gender issues
- Criticism and self-criticism
- Production of free, creative and inductive thinking
- Others

Students are expected to acquire the following general competencies:

- Employ a range of data sources to evaluate competing explanations of macroeconomic phenomena
- Demonstrate adequate self-management, learning, communication, and problem-solving skills
- Decision-making
- Working independently

(4) **MODULE OUTLINE**

The indicative module outline is as follows:

- Measuring national income and growth
- Business cycles
- The money and loanable funds markets
- Inflation
- Unemployment
- Aggregate supply and aggregate demand
- Short-run and long-run closed economy equilibrium (IS-LM)
- Short-run and long-run closed economy equilibrium (Mundell-Fleming)
- Fiscal and monetary policy
- Economic growth

(2) SHORT DESCRIPTION

It deals with the principles governing taxation and the basic principles of exercising the tax authority. It examines the legal rules and principles governing the budget stages and the role of the EU institutions in the final shaping of the macro-economic figures of the Member States’ annual state budget. Case studies will be used to support learning.

(3) LEARNING OUTCOMES

**Learning Outcomes**

The learning outcomes of the course are described, the specific knowledge, as well as the skills and abilities that students will acquire after the successful completion of the course at the appropriate level.

Consult Appendix A

- Description of the Level of Learning Outcomes for each study cycle according to the European Higher Education Area Qualifications Framework (QF-EHEA)
- Descriptors of Levels 6, 7 & 8 of the European Qualifications Framework for Lifelong Learning and Annex B
- Summary Guide for writing Learning Outcomes

After successful completion of the course, students will be able to:

1. Understand the concept of tax and the limits of tax authority
2. Understand the basic function of European Economic Governance
3. Interpret the rules related to the above concepts

**General Competencies**
Taking into consideration the general competences that the degree-holder must acquire (as these appear in the Diploma Supplement and appear below), chose the ones that the course is aiming at.

- Search for, analysis and synthesis of data and information, with the use of the necessary technology
- Adapting to new situations
- Decision-making
- Working independently
- Team work
- Working in an international environment
- Working in an interdisciplinary environment
- Production of new research ideas
- Project planning and management
- Respect for difference and multiculturalism
- Respect for the natural environment
- Showing social, professional and ethical responsibility and sensitivity to gender issues
- Criticism and self-criticism
- Production of free, creative and inductive thinking
- Others

Students are expected to acquire the following general competencies
- Understanding key concepts
- Interpreting relevant rules
- Legal research
- Writing a structured response

(4) MODULE OUTLINE

The indicative module outline is as follows:
- Concept of tax
- Principle of tax certainty
- Principle of tax legality
- Principle of tax fairness
- European Semester
- Fiscal programs
- Stability Programs
- National Reform Programs
- Excessive Deficit Procedure

(5) TEACHING AND LEARNING METHODS - ASSESSMENT

**DELIVERY MODE**
Face-to-face, Distance Learning.

**USE OF INFORMATION AND COMMUNICATIONS TECHNOLOGY**
Use of ICT in teaching, laboratory education, communication with students

- Communication and content sharing via Open E-Class
- Use of general software (e.g. Microsoft Office suite)
- Use of specialised software online / at the university laboratory

**TEACHING**
The way and methods of teaching are described in detail.

- Lectures, Seminars, Laboratory Exercise, Field Exercise, Bibliography Study & Analysis, Tutorial, Practice (Placement), Clinical Practice, Artistic Workshop, Interactive teaching, Educational visits, Project preparation, Writing of work / assignments, Artistic creation, etc.

**Activity** | **Semester Workload [1 ECTS = 28 hours]**
--- | ---
Lectures | 26 hours
Tutorials / Seminars | 13 hours
Coursework preparation | 26 hours
Bibliographic research | 20 hours
Self-study | 83 hours
Indicate the student’s study hours for each learning activity as well as the hours of self-study in accordance with ECTS principles. The total is 168 hours.

The module assessment language is in English and students are expected to exhibit the required level of proficiency.

The assessment of the course consists of:
- Coursework (30% - written assignment)
- Final examination (70% - essay development)

The evaluation criteria across modes of assessment include the following:
- Demonstration of key knowledge related to the content of course
- Demonstration of an ability to apply the knowledge in a given problem or case study
- Critical ability evident in applying appropriate methods/knowledge in a given case and/or developing theory-based and literature based arguments.
- Structure and presentation
- Use of English language

More detailed assessment criteria will be provided to you in the module handbook document or posted on the course webpage, if deemed necessary.

(2) SHORT DESCRIPTION

The course provides an introduction to managerial accounting and costing methods. It describes the basic categories of costs and develops methods for the quantification of their behavior. Moreover, it also develops cost accounting concepts and methodologies in order to aid decision making in a firm. Case studies will be used to support learning.

(3) LEARNING OUTCOMES

Learning Outcomes

The learning outcomes of the course are described, the specific knowledge, as well as the skills and abilities that students will acquire after the successful completion of the course at the appropriate level.

Consult Appendix A

- Description of the Level of Learning Outcomes for each study cycle according to the European Higher Education Area Qualifications Framework (QF-EHEA)
- Descriptors of Levels 6, 7 & 8 of the European Qualifications Framework for Lifelong Learning and Annex B
- Summary Guide for writing Learning Outcomes

After successful completion of the course, students will be able to:

1. Explain the nature and behavior of various cost categories in relation to business activity.
2. Describe costs by classification, behavior and purpose as well as identify and understand the major elements and components of cost accounting.
3. Explain and apply cost accounting techniques as well as identify the purpose and major component sections of cost accounting.
4. Estimate the break-even point and take decisions about the relation between cost, volume and profit.
5. Understand the use of accounting for managers of the company for planning, controlling and decision-making purposes.

**General Competencies**

Taking into consideration the general competences that the degree-holder must acquire (as these appear in the Diploma Supplement and appear below), chose the ones that the course is aiming at.

<table>
<thead>
<tr>
<th>General Competencies</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Search for, analysis and synthesis of data and technology</td>
<td>Project planning and management</td>

</tr>
</tbody>
</table>

Students are expected to acquire the following general competencies:

- Adopting to new situations.
- Search for, analysis and synthesis of data and information, with the use of the necessary technology.
- Decision-making.
- Work independently as well as in teams.
- Working in an interdisciplinary environment.

(4) **MODULE OUTLINE**

The indicative module outline is as follows:

- Accounting for management, Cost management accounting versus financial accounting.
- Sources of Information for Management, Information Systems for Performance Management, Management Reports, Managing information, Information Systems and Data Analysis.
- Production and non-production costs, direct and indirect costs, fixed and variable costs.
- Life-Cycle Costing, Make or Buy Decisions and Relevant Cost Analysis.
- Cost Behavior and Analysis, Target Costing.
- Job and Process Costing.
- Marginal and Absorption Costing.
- Cost-volume-profit analysis, Sales Mix.
- Cost Analysis for Multiple Products.
- Limiting Factors, Throughput Accounting.
- Activity-Based Costing.
- Cost Accounting for Business Segments.
- Environmental Accounting.

### (2) SHORT DESCRIPTION

The aim of this course is to analyze the International Financial reporting Standards (IFRS) and describe the accounting procedures needed in order to implement the IFRS. The course is based on both theoretical analysis of the International Accounting Standards and the International Financial Reporting Standards as well as practical applications that help the student understand and implement the IFRS. Case studies will be used to support learning.

### (3) LEARNING OUTCOMES

#### Learning Outcomes

The learning outcomes of the course are described, the specific knowledge, as well as the skills and abilities that students will acquire after the successful completion of the course at the appropriate level.

- Description of the Level of Learning Outcomes for each study cycle according to the European Higher Education Area Qualifications Framework (QF-EHEA)
- Descriptors of Levels 6, 7 & 8 of the European Qualifications Framework for Lifelong Learning and Annex B
- Summary Guide for writing Learning Outcomes

After successful completion of the course, students will be able to:

1. Implement the International Financial Reporting Standards (IFRS).
2. Use judgement to choose appropriate accounting policies.
3. Provide appropriate accounting treatment of accounting items based on the IFRS.
4. Prepare financial statements according to the IFRS.
General Competencies

Taking into consideration the general competences that the degree-holder must acquire (as these appear in the Diploma Supplement and appear below), chose the ones that the course is aiming at.

- Search for, analysis and synthesis of data and technology
- Adapting to new situations
- Decision-making
- Working independently
- Team work
- Working in an international environment
- Working in an interdisciplinary environment
- Production of new research ideas
- Project planning and management
- Respect for difference and multiculturalism
- Respect for the natural environment
- Showing social, professional and ethical responsibility and sensitivity to gender issues
- Criticism and self-criticism
- Production of free, creative and inductive thinking
- Others

Students are expected to acquire the following general competencies:

- Adopting to new situations.
- Decision-making to implement IFRS.
- Work independently as well as in teams.
- Working in an international environment.

(4) MODULE OUTLINE

The indicative module outline is as follows:

- IAS 8: Accounting Policies, Changes in Accounting Estimates and Errors.
- IAS 10: Events After the Reporting Period, Case Studies.
- IAS 2: Inventories and IAS 41: Agriculture, Case Studies.
- IAS 16: Property, Plant and Equipment, Case Studies.
- IAS 40: Investment Property, Case Studies.
- IAS 38: Intangible Assets, Case Studies.
- IFRS 16: Leases, Case Studies.
- IFRS 15: Revenue from Contracts with Customers, Case Studies.
- IAS 33: Earnings Per Share, Case Studies.

(2) SHORT DESCRIPTION

Due to the economic globalization and the modernization of financial assets, the in-depth understanding of financial markets' functioning and interconnectedness has become increasingly complex. In this module the primary intent is to introduce students to the institutional environment in which financial transactions take place and discuss the underlying economic background. The module discusses the economic principles underpinning the international financial system covering topics related to the functioning of capital markets, financial intermediation, monetary economics, economics of regulation as well as economic crises. Case studies will be used to support learning.

(3) LEARNING OUTCOMES

Learning Outcomes

The learning outcomes of the course are described, the specific knowledge, as well as the skills and abilities that students will acquire after the successful completion of the course at the appropriate level.

Consult Appendix A

- Description of the Level of Learning Outcomes for each study cycle according to the European Higher Education Area Qualifications Framework (QF-EHEA)
- Descriptors of Levels 6, 7 & 8 of the European Qualifications Framework for Lifelong Learning and Annex B
- Summary Guide for writing Learning Outcomes

After successful completion of the course, students will be able to:
1. Engage with concepts associated with the economics and functioning of the international financial markets and institutions.
2. Critically discuss issues pertaining the regulation and supervision of financial markets.
3. Interpret theoretical concepts related to the national and international monetary system.
4. Critically evaluate information related to financial issues in a global context with an emphasis on the advantages and complexity of being international.

**General Competencies**

Taking into consideration the general competences that the degree-holder must acquire (as these appear in the Diploma Supplement and appear below), chose the ones that the course is aiming at.

| Search for, analysis and synthesis of data and technology | Project planning and management |
| Adapting to new situations | Respect for difference and multiculturalism |
| Decision-making | Respect for the natural environment |
| Working independently | Sensitivity to gender issues |
| Team work | Criticism and self-criticism |
| Working in an international environment | Production of free, creative and inductive thinking |
| Working in an interdisciplinary environment | Others… |

Students are expected to acquire the following general competencies

- Work independently
- Decision-making
- Search for, analysis and synthesis of data and information, with the use of the necessary technology
- Promotion of free, creative, critical and inductive thinking

(4) **MODULE OUTLINE**

The indicative module outline is as follows:

- Money and the Financial System
- The Behaviour of Interest Rates
- The Risk and Term Structure of Interest Rates
- Economics of Financial Regulation
- Game Theory and Financial Intermediation
- Banking Industry: Structure and Competition
- Non-Depository Financial Institutions
- Central Banking
- Monetary Theory and Policy
- Financial Crises and the Subprime Meltdown

TEACHING AND ASSESSMENT LANGUAGE: English

THE COURSE IS AVAILABLE TO ERASMUS STUDENTS: No

COURSE WEBPAGE: Please visit [https://openeclass.uom.gr/](https://openeclass.uom.gr/)

(2) SHORT DESCRIPTION
The purpose of the course is to provide students with the practical skills necessary to apply quantitative techniques to a given case. Emphasis will be placed on the implementation of quantitative skills, effective communication and presentation of results as well as the extraction of useful conclusions, while working in a team environment. Cases studies will be used to support learning.

(3) LEARNING OUTCOMES
Learning Outcomes
The learning outcomes of the course are described, the specific knowledge, as well as the skills and abilities that students will acquire after the successful completion of the course at the appropriate level.

Consult Appendix A
- Description of the Level of Learning Outcomes for each study cycle according to the European Higher Education Area Qualifications Framework (QF-EHEA)
- Descriptors of Levels 6, 7 & 8 of the European Qualifications Framework for Lifelong Learning and Annex B
- Summary Guide for writing Learning Outcomes

After successful completion of the course, students will be able to:
1. Engage with concepts and principles of data analysis techniques.
2. Demonstrate the ability to use a range of established techniques for graphical and numerical summaries of data and statistical tests.
3. Apply appropriate methods of quantitative analysis to a given case in order to come up with practical conclusions.
4. Use appropriate data and quantitative analysis software in a given case
5. Prepare a well-written report in order to address problems of quantitative nature.

General Competencies
Taking into consideration the general competences that the degree-holder must acquire (as these appear in the Diploma Supplement and appear below), chose the ones that the course is aiming at.

Search for, analysis and synthesis of data and information, with the use of the necessary technology
Adapting to new situations
Decision-making
Working independently
Team work
Working in an international environment
Working in an interdisciplinary environment
Production of new research ideas

Respect for difference and multiculturalism
Respect for the natural environment
Showing social, professional and ethical responsibility and sensitivity to gender issues
Criticism and self-criticism
Production of free, creative and inductive thinking
Others...

Students are expected to acquire the following general competencies
• Search for, analysis and synthesis of data and information, with the use of the necessary technology
• Demonstrate adequate self-management, learning, communication, and problem-solving skills
• Decision-making
• Team work

(4) MODULE OUTLINE
The indicative module outline is as follows:
• Data collection and sampling, accessing and downloading electronic data
• Presenting statistical data and writing a statistics report
• Implementing hypothesis testing
• Test of independence and analysis of variance
• Nonparametric tests
• Statistical methods for quality control
• Decision analysis
• Linear programming

(2) SHORT DESCRIPTION

This course aims to provide an understanding of the basic principles and practice of strategic management and marketing, both external to the organisation, and internal within the organisation. It is concerned with strategic decision-making in implementing strategy to secure the long term success of the organisation. This course looks at the content and process of strategic decision making from the perspective of managers who are responsible for an entire business unit. Case studies will be used to support learning.

(3) LEARNING OUTCOMES

Learning Outcomes
The learning outcomes of the course are described, the specific knowledge, as well as the skills and abilities that students will acquire after the successful completion of the course at the appropriate level. Consult Appendix A

- Description of the Level of Learning Outcomes for each study cycle according to the European Higher Education Area Qualifications Framework (QF-EHEA)
- Descriptors of Levels 6, 7 & 8 of the European Qualifications Framework for Lifelong Learning and Annex B
- Summary Guide for writing Learning Outcomes

After successful completion of the course, students will be able to:
1. Appreciate the complexity of strategic decision making.
2. Develop strategic analysis skills (environment, industry and organisation).
3. Comment on the strategy of an organisation and its competitive position.
4. Understand how to analyse data about a company and how to build a strategic argument.

| Decision-making | Showing social, professional and ethical responsibility and sensitivity to gender issues |
| Working independently | Criticism and self-criticism |
| Team work | Production of free, creative and inductive thinking |
| Working in an international environment | Others |
| Working in an interdisciplinary environment | Production of new research ideas |

Students are expected to acquire the following general competencies:

- Search for, analysis and synthesis of data and information, with the use of the necessary technology.
- Decision-making.
- Working independently.
- Search for, analysis and synthesis of data and information, with the use of the necessary technology.
- Adapting to new situations.

(4) MODULE OUTLINE

The indicative module outline is as follows:

- An introduction to strategic management, with a focus on what is meant by the term “strategy”.
- Strategic Analysis, tools and techniques (industry analysis, core capabilities, generic strategies and perceived use value).
- Practical experience applying theory, tools and techniques through case studies and assessment project.
- Strategy as Competitive Positioning and as Resource and Knowledge Advantage.
- Establishing Direction: Strategic Vision and Objectives.
- Internal Analysis: Company Resources and Capabilities.
- Strategy Implementation: General Framework.

Self-study 90 hours

Total 168 hours

ASSESSMENT

The module assessment language is in English and
students are expected to exhibit the required level of
proficiency.

The assessment of the course consists of:
• Coursework (40% - public presentation)
• Final examination (60% - multiple choice test)

The evaluation criteria across modes of assessment
include the following:
• Demonstration of key knowledge related to the
content of course
• Demonstration of an ability to apply the
knowledge in a given problem or case study
• Critical ability evident in applying appropriate
methods/knowledge in a given case and/or
developing theory-based and literature based
arguments.
• Structure and presentation
• Use of English language

More detailed assessment criteria will be provided to you
in the module handbook document or posted on the
course webpage, if deemed necessary.

### Prerequisites:

NONE

### Teaching and Assessment Language:

English

### The Course is Available to Erasmus Students:

NO

### Course Webpage

Please visit [https://openeclass.uom.gr/](https://openeclass.uom.gr/)

### (2) Short Description

The course provides an in-depth analysis of the accounting treatment of special items like impairment losses, provisions and deferred taxes. Moreover, it develops the key accounting practice for special forms of accounting relating to public sector accounting and shipping accounting as well as issues on disclosures including ESG disclosure. Case studies will be used to support learning.

### (3) Learning Outcomes

Learning Outcomes

The learning outcomes of the course are described, the specific knowledge, as well as the skills and abilities that students will acquire after the successful completion of the course at the appropriate level.

Consult Appendix A

- Description of the Level of Learning Outcomes for each study cycle according to the European Higher Education Area Qualifications Framework (QF-EHEA)
- Descriptors of Levels 6, 7 & 8 of the European Qualifications Framework for Lifelong Learning and Annex B
- Summary Guide for Writing Learning Outcomes

After successful completion of the course, students will be able to:

1. Analyze special topics in accounting.
2. Use impairment testing for assets.
3. Use judgement to recognize provisions, and disclose contingent liabilities and assets.
4. Analyze special forms of accounting including, Maritime Accounting, Hotel Accounting and Public Sector Accounting.

General Competencies
Taking into consideration the general competences that the degree-holder must acquire (as these appear in the Diploma Supplement and appear below), choose the ones that the course is aiming at.

- Search for, analysis and synthesis of data and information, with the use of the necessary technology
- Adapting to new situations
- Decision-making
- Working independently
- Team work
- Working in an international environment
- Working in an interdisciplinary environment
- Production of new research ideas
- Project planning and management
- Respect for difference and multiculturalism
- Respect for the natural environment
- Showing social, professional and ethical responsibility and sensitivity to gender issues
- Criticism and self-criticism
- Production of free, creative and inductive thinking
- Others

Students are expected to acquire the following general competencies
- Work as part of a team.
- Use accounting information for decision-making.
- Work independently.
- Use accounting judgement to form business decisions.

(4) MODULE OUTLINE
The indicative module outline is as follows:
- Introduction to special issues in accounting.
- Impairment accounting.
- Reversal of an impairment loss.
- Accounting for Provisions.
- Disclosure of Contingent Liabilities and Assets.
- Deferred Taxation.
- Accounting of Government Grants.
- Maritime accounting.
- Hotel Accounting.
- Public Sector Accounting.
- Non-Financial Information Disclosure.
- Special Issues in ESG Disclosures.
- Non-Financial Disclosure of Public Interest Entities.

(2) SHORT DESCRIPTION

This module aims to develop a number of tools that can be used for the analysis of the financial statements and decision making. It describes the inner and outer economic environment of a firm and how it affects its main business decisions. Moreover, it provides a number of methodologies for the valuation of profit and non-profit entities. Case studies will be used to support learning.

(3) LEARNING OUTCOMES

Learning Outcomes
The learning outcomes of the course are described, the specific knowledge, as well as the skills and abilities that students will acquire after the successful completion of the course at the appropriate level.
Consult Appendix A
- Description of the Level of Learning Outcomes for each study cycle according to the European Higher Education Area Qualifications Framework (QF-EHEA)
- Descriptors of Levels 6, 7 & 8 of the European Qualifications Framework for Lifelong Learning and Annex B
- Summary Guide for writing Learning Outcomes

After successful completion of the course, students will be able to:
1. Evaluate the financial reporting framework and advise on and report the financial performance of entities.
2. Explain reporting issues relating to specialized entities as well as discuss the implications of changes in accounting regulation on financial reporting.
3. Appraise the financial performance and position of entities and evaluate current developments.
4. Assess the strategic position of an organization and evaluate the strategic choices available to an organization.
5. Discuss how an organization evaluates business processes and structures in order to implement and support the organization’s strategy taking into account of customer and other major stakeholder requirements.

**General Competencies**

Taking into consideration the general competences that the degree-holder must acquire (as these appear in the Diploma Supplement and appear below), chose the ones that the course is aiming at.

- Search for, analysis and synthesis of data and information, with the use of the necessary technology
- Adapting to new situations
- Decision-making
- Working independently
- Team work
- Working in an international environment
- Working in an interdisciplinary environment
- Production of new research ideas
- Project planning and management
- Respect for difference and multiculturalism
- Showing social, professional and ethical responsibility and sensitivity to gender issues
- Criticism and self-criticism
- Production of free, creative and inductive thinking
- Others

Students are expected to acquire the following general competencies

- Adopting to new situations.
- Decision-making.
- Work independently as well as in teams.
- Working in an international environment.

(4) **MODULE OUTLINE**

The indicative module outline is as follows:

- An overview of financial statements analysis.
- Vertical and horizontal analysis, An introduction to financial analysis ratios.
- Earnings and financial reporting quality, Limitations of financial statements.
- Liquidity and Activity ratios, Profitability and capital structure ratios, Relating the ratios: The DuPont system.
- Market ratios: Economy industry and firm.
- Projections and pro-forma statements.
- Limitations of financial statements for forecasting purposes and interpretation techniques.
- Financial analysis of business combinations.
- Financial analysis of not for profit and public sector entities.

PREREQUISITES: NONE

TEACHING AND ASSESSMENT LANGUAGE: English

THE COURSE IS AVAILABLE TO ERASMUS STUDENTS
NO

COURSE WEBPAGE
Please visit https://openeclass.uom.gr/

(2) SHORT DESCRIPTION
The course develops the fundamental knowledge required for the evaluation of capital, the valuation of firms and their stocks, as well as issues related to the management of short-run financing. Fundamental concepts such as the weighted average cost of capital will be analysed in-depth to provide an accurate determination, while a range of capital investment types will be evaluated on the basis of their opportunity cost. The crucial issue of the ideal capital structure of the firm will be evaluated with a view to maximizing shareholders’ wealth. Finally, the module considers fundamental principles of dividend policy. Case studies will be used to support learning.

(3) LEARNING OUTCOMES
Learning Outcomes
The learning outcomes of the course are described, the specific knowledge, as well as the skills and abilities that students will acquire after the successful completion of the course at the appropriate level.

Consult Appendix A

- Description of the Level of Learning Outcomes for each study cycle according to the European Higher Education Area Qualifications Framework (QF-EHEA)
- Descriptors of Levels 6, 7 & 8 of the European Qualifications Framework for Lifelong Learning and Annex B
- Summary Guide for writing Learning Outcomes

After successful completion of the course, students will be able to:
1. Distinguish different types of business structure, identify the major corporate financial decisions and corporate objective, and describe some important basic concepts.
2. Apply skills in evaluating capital budgeting projects by using different methods of project evaluation.
3. Use appropriate techniques to determine the cost of capital of a firm.
4. Critically apply and discuss the theories detailing the capital structure and assess the impact of capital structure on the value of the firm and the price of its stock.
5. Critically discuss the theories related to corporations’ dividend policy.

**General Competencies**

Taking into consideration the general competences that the degree-holder must acquire (as these appear in the Diploma Supplement and appear below), chose the ones that the course is aiming at.

- Search for, analysis and synthesis of data and technology: Respect for the necessary technology
- Adapting to new situations: Respect for the natural environment
- Decision-making: Sensitivity to gender issues
- Working independently: Criticism and self-criticism
- Team work: Production of free, creative and inductive thinking
- Working in an international environment: Others
- Working in an interdisciplinary environment: Others
- Production of new research ideas: Others

Students are expected to acquire the following general competencies:

- Critical thinking and problem solving. Our students will have critical thinking and problem solving skills applicable to business and management practice or issues.
- Teamwork. Our graduates will be effective team participants.
- Promotion of free, creative and inductive thinking.
- Communication. Our students will produce oral presentations that communicate complex disciplinary ideas and information effectively for the intended audience and purpose.

**MODULE OUTLINE**

The indicative module outline is as follows:

- Introduction to Corporate Finance
- Cost of Capital Determination
- Capital Budgeting in Practice
- Capital Structure Theory
- Optimal Capital Structure
- Working Capital Management
- Dividend Policy
- Valuation
- Mergers and Acquisitions

PREREQUISITES: NONE

TEACHING AND ASSESSMENT LANGUAGE: English

THE COURSE IS AVAILABLE TO ERASMUS STUDENTS: NO

COURSE WEBPAGE: Please visit https://openeclass.uom.gr/

(2) SHORT DESCRIPTION

The course examines the theoretical basis and practical approach to the management of stocks and investment portfolios. The basic theoretical framework is standard portfolio theory and its extensions. The course objective is to equip students with practical skills for investment management. The course will rely heavily on Excel modeling using real world data. Students, apart from engaging with the theoretical foundations of portfolio theory, they will also develop a practical understanding of the investment process stages, involve the concept of market expectations, form a strategic asset allocation basis and select the optimal investment strategy. Case studies will be used to support learning.

(3) LEARNING OUTCOMES

Learning Outcomes
The learning outcomes of the course are described, the specific knowledge, as well as the skills and abilities that students will acquire after the successful completion of the course at the appropriate level.

Consult Appendix A
- Description of the Level of Learning Outcomes for each study cycle according to the European Higher Education Area Qualifications Framework (QF-EHEA)
- Descriptors of Levels 6, 7 & 8 of the European Qualifications Framework for Lifelong Learning and Annex B
- Summary Guide for writing Learning Outcomes

After successful completion of the course, students will be able to:
1. Compare assets based on the risk-return relationship.
2. Build efficient portfolios with or without constraints.
3. Distinguish between systematic and idiosyncratic risk.
4. Acknowledge the existence of mispricing on stocks or portfolios.
5. Critically apply and discuss the theories detailing the CAPM and their implications on real financial data.

General Competencies
Taking into consideration the general competences that the degree-holder must acquire (as these appear in the Diploma Supplement and appear below), chose the ones that the course is aiming at.

Search for, analysis and synthesis of data and information, with the use of the necessary technology
Adapting to new situations
Decision-making
Working independently
Team work
Working in an international environment
Working in an interdisciplinary environment
Production of new research ideas

Project planning and management
Respect for difference and multiculturalism
Respect for the natural environment
Showing social, professional and ethical responsibility and sensitivity to gender issues
Criticism and self-criticism
Production of free, creative and inductive thinking
Others

Students are expected to acquire the following general competencies:
- Critical thinking and problem solving. Students will demonstrate critical thinking and problem solving skills applicable to business and management practice or issues.
- Teamwork. Students will be effective team participants.
- Promotion of free, creative and inductive thinking.
- Communication. Students will produce oral presentations that communicate complex disciplinary ideas and information effectively for the intended audience and purpose.

(4) MODULE OUTLINE

The indicative module outline is as follows:
- Portfolio management: An overview
- Portfolio risk and return
- Risk aversion and portfolio selection
- Efficient frontier and investor’s optimal portfolio
- Portfolio optimization with constraints
- Capital allocation line and optimal risky portfolio
- Capital market theory
- Deriving the CAPM
- Empirical estimation of CAPM
- CAPM’s applications in portfolio construction
- Portfolio performance appraisal measures

(5) TEACHING AND LEARNING METHODS - ASSESSMENT

DELIVERY MODE
Face-to-face, Distance Learning.
Face-to-face, Distance learning

COURSE WEBPAGE
Please visit https://openeclass.uom.gr/

(2) SHORT DESCRIPTION

The module provides an introduction to the interpretation and analysis of economic and financial data through the application of appropriate econometric methodologies. The content includes simple and multiple regression analysis, autocorrelation, multicollinearity, heteroscedasticity, model specification, and dummy variables. Appropriate methods will be discussed to test research hypotheses and evaluate the appropriateness of the models used. Case studies will be used to support learning.

(3) LEARNING OUTCOMES

Learning Outcomes
The learning outcomes of the course are described, the specific knowledge, as well as the skills and abilities that students will acquire after the successful completion of the course at the appropriate level.
Consult Appendix A
- Description of the Level of Learning Outcomes for each study cycle according to the European Higher Education Area Qualifications Framework (QF-EHEA)
- Descriptors of Levels 6, 7 & 8 of the European Qualifications Framework for Lifelong Learning and Annex B
- Summary Guide for writing Learning Outcomes

After successful completion of the course, students will be able to:
1. Engage with the theoretical underpinnings of simple and multiple regression and apply them in an example case.
2. Identify the nature of specific econometric problems and select an appropriate method of addressing them.
3. Interpret the results of econometric analysis and relate these to the relevant economic and financial theory.
4. Use appropriate econometric software to undertake the estimation of economic relationships.

**General Competencies**
Taking into consideration the general competences that the degree-holder must acquire (as these appear in the Diploma Supplement and appear below), chose the ones that the course is aiming at.

| Search for, analysis and synthesis of data and information, with the use of the necessary technology | Project planning and management |
| Adapting to new situations | Respect for difference and multiculturalism |
| Decision-making | Sensitivity to gender issues |
| Working independently | Criticism and self-criticism |
| Team work | Production of free, creative and inductive thinking |
| Working in an international environment | Others |
| Working in an interdisciplinary environment | Production of new research ideas |

Students are expected to acquire the following general competencies:
- Search for, analysis and synthesis of data and information, with the use of the necessary technology
- Demonstrate adequate self-management, learning, communication, and problem-solving skills
- Decision-making
- Working independently

**MODULE OUTLINE**
The indicative module outline is as follows:
- Econometric data
- Simple regression analysis
- Multiple regression analysis
- Testing econometric hypotheses
- Autocorrelation
- Multicollinearity
- Heteroscedasticity
- Model specification
- Dummy variables

**TEACHING AND LEARNING METHODS - ASSESSMENT**

| DELIVERY MODE | Face-to-face, Distance learning |
| USE OF INFORMATION AND COMMUNICATIONS TECHNOLOGY | Communication and content sharing via Open E-Class |
| Use of ICT in teaching, laboratory education, communication with students | Use of general software (e.g. Microsoft Office suite) |
| | Use of specialised econometrics software |

**TEACHING**
The way and methods of teaching are described in detail.

ASSESSMENT

Description of the assessment process

Assessment Language, Assessment Methods, Formative or Summative, Multiple Choice Test, Short Answer Questions, Essay Development Questions, Problem Solving, Written Assignment, Report/Report, Oral Examination, Public Presentation, Laboratory Paper, Clinical Patient Examination, Artistic Interpretation, Other/Other

Explicitly defined assessment criteria and if and where they are accessible by students are mentioned.

The module assessment language is in English and students are expected to exhibit the required level of proficiency.

The assessment of the course consists of:
- Mid-term test (30% - multiple choice questions)
- Final examination (70%, problem solving)

The evaluation criteria across modes of assessment include the following:
- Demonstration of key knowledge related to the content of course
- Demonstration of an ability to apply the knowledge in a given problem or case study
- Critical ability evident in applying appropriate methods/knowledge in a given case and/or developing theory-based and literature based arguments.
- Structure and presentation
- Use of English language

More detailed assessment criteria will be provided to you in the module handbook document or posted on the course webpage, if deemed necessary.

### TEACHING AND ASSESSMENT LANGUAGE:

English

| THE COURSE IS AVAILABLE TO ERASMUS STUDENTS | NO |

| COURSE WEBPAGE | Please visit [https://openeclass.uom.gr/](https://openeclass.uom.gr/) |

### (2) SHORT DESCRIPTION

The course analyzes advanced topics of International Financial Reporting Standards (IFRS). In this respect, it describes the accounting procedures and develops the appropriate accounting treatment of special topics like deferred taxation. The course is based both on the analysis of the relevant International Accounting Standards and International Financial Reporting Standards as well as on case studies. Case studies will be used to support learning.

### (3) LEARNING OUTCOMES

#### Learning Outcomes

The learning outcomes of the course are described, the specific knowledge, as well as the skills and abilities that students will acquire after the successful completion of the course at the appropriate level.

- Description of the Level of Learning Outcomes for each study cycle according to the European Higher Education Area Qualifications Framework (QF-EHEA)
- Descriptors of Levels 6, 7 & 8 of the European Qualifications Framework for Lifelong Learning and Annex B
- Summary Guide for writing Learning Outcomes

After successful completion of the course, students will be able to:

1. Implement the International Financial Reporting Standards (IFRS).
2. Use judgement to choose appropriate accounting treatment under IFRS.
3. Provide appropriate accounting treatment of accounting items based on the IFRS.
4. Provide guidance on accounting treatment of special items under IFRS.
General Competencies

Taking into consideration the general competences that the degree-holder must acquire (as these appear in the Diploma Supplement and appear below), chose the ones that the course is aiming at.

- Search for, analysis and synthesis of data and information, with the use of the necessary technology
- Adapting to new situations
- Decision-making
- Working independently
- Team work
- Working in an international environment
- Working in an interdisciplinary environment
- Production of new research ideas
- Project planning and management
- Respect for difference and multiculturalism
- Respect for the natural environment
- Showing social, professional and ethical responsibility and sensitivity to gender issues
- Criticism and self-criticism
- Production of free, creative and inductive thinking
- Others

Students are expected to acquire the following general competencies

- Adopting to new situations.
- Decision-making to implement IFRS.
- Work independently as well as in teams.
- Working in an international environment.

(4) MODULE OUTLINE

The indicative module outline is as follows:

- IFRS 8: Operating Segments.
- IFRS 14: Regulatory Deferral Accounts.
- IFRS 13: Fair Value.

(2) SHORT DESCRIPTION

This module aims to develop the basic principles of the auditing and assurance process in the context of professional regulatory and professional ethics frameworks. Moreover, the course analyzes, evaluates and concludes on the assurance engagement and other audit and assurance issues in the context of best practice, along with an introduction to internal audit procedures. Case studies will be used to support learning.

(3) LEARNING OUTCOMES

Learning Outcomes
The learning outcomes of the course are described, the specific knowledge, as well as the skills and abilities that students will acquire after the successful completion of the course at the appropriate level.
Consult Appendix A
- Description of the Level of Learning Outcomes for each study cycle according to the European Higher Education Area Qualifications Framework (QF-EHEA)
- Descriptors of Levels 6, 7 & 8 of the European Qualifications Framework for Lifelong Learning and Annex B
- Summary Guide for writing Learning Outcomes

After successful completion of the course, students will be able to:
1. Explain the nature, purpose and scope of assurance engagements including the role of the external audit and its regulatory and ethical framework.
2. Explain the nature of internal audit and describe its role as part of overall performance management and its relationship with the external audit.
3. Demonstrate how the auditor obtains an understanding of the entity and its environment, assesses the risk of material misstatement and plans an audit of financial statements.

4. Identify and describe the work and evidence required to meet the objectives of audit engagements and the application of the International Standards on Auditing (ISA).

5. Evaluate findings and modify the audit plan and explain how the conclusions from audit work are reflected in different types of audit report, explain the elements of each type of report.

### General Competencies

Taking into consideration the general competences that the degree-holder must acquire (as these appear in the Diploma Supplement and appear below), chose the ones that the course is aiming at.

- Search for, analysis and synthesis of data and technology, with the use of the necessary technology.
- Adapting to new situations.
- Decision-making.
- Working independently.
- Team work.
- Working in an international environment.
- Working in an interdisciplinary environment.
- Production of new research ideas.
- Project planning and management.
- Respect for difference and multiculturalism.
- Respect for the natural environment.
- Showing social, professional and ethical responsibility and sensitivity to gender issues.
- Criticism and self-criticism.
- Production of free, creative and inductive thinking.
- Others.

Students are expected to acquire the following general competencies:

- Decision-making.
- Working in an international environment.
- Work independently as well as in teams.
- Adapting to new situations.

### (4) MODULE OUTLINE

The indicative module outline is as follows:

- Audit Framework and Regulatory Environment, Information Technology, Social and Environmental Auditing, Other assurance engagements.
- Audit Report, External and internal audit, Reports to Management.
- Professional and Ethical Considerations.
- Internal Audit – Control.
- Audit Sampling, Planning and Risk Assessment, Accepting the audit, Continuation of an audit.
- Understanding of the entities’ environment, Audit Evidence, Planning and documentation.
- Auditing of Revenues, Auditing Expenses, Auditing Payroll Transactions.
- Auditing of Tangible Assets.
- Auditing of Intangible Assets.
- Auditing Inventories.
- Auditing Cash and Investments.
- Auditing Stockholders’ Equity and Liabilities.
- Management Representations, Review and reporting, Audit finalization and the final review, Subsequent events, Going Concern.

### (5) TEACHING AND LEARNING METHODS - ASSESSMENT

#### DELIVERY MODE

Face-to-face, Distance learning.
### USE OF INFORMATION AND COMMUNICATIONS TECHNOLOGY

Use of ICT in teaching, laboratory education, communication with students:

- Communication and content sharing via Open E-Class
- Use of general software (e.g. Microsoft Office suite)

### TEACHING

The way and methods of teaching are described in detail.

Lectures, Seminars, Laboratory Exercise, Field Exercise, Bibliography Study & Analysis, Tutorial, Practice (Placement), Clinical Practice, Artistic Workshop, Interactive teaching, Educational visits, Project preparation, Writing of work/assignments, Artistic creation, etc.

Indicate the student's study hours for each learning activity as well as the hours of self-study in accordance with ECTS principles.

### Activity | Semester Workload
--- | ---
Lectures | 26 hours
Tutorials / Seminars | 13 hours
Laboratory / Clinical Practice | 29 hours
Coursework preparation | 29 hours
Bibliographic research | 13 hours
Field trips / field work | 4 hours
Practice / placement | 4 hours
Self-study | 100 hours

Total | 168 hours

### ASSESSMENT

Description of the assessment process

(2) SHORT DESCRIPTION

This module provides an introduction both to the main forces shaping the international financial environment and to the techniques and strategies used by organisations to respond to this environment when making financial decisions. Among the issues covered are international trade, capital flows, exchange rate determination as well as international investment decisions. Case studies will be used to support learning.

(3) LEARNING OUTCOMES

Learning Outcomes

The learning outcomes of the course are described, the specific knowledge, as well as the skills and abilities that students will acquire after the successful completion of the course at the appropriate level. Consult Appendix A

- Description of the Level of Learning Outcomes for each study cycle according to the European Higher Education Area Qualifications Framework (QF-EHEA)
- Descriptors of Levels 6, 7 & 8 of the European Qualifications Framework for Lifelong Learning and Annex B
- Summary Guide for writing Learning Outcomes

After successful completion of the course, students will be able to:

- Appreciate the most important similarities and differences between studying financial decision making in a national and an international context
- To understand the basic functions of international financial markets and the way in which international financial institutions interact with these markets
- To understand the equilibrium conditions governing international markets for short-term capital and the evidence that has been put forward to test whether these conditions hold in practice
To understand the concepts of real and nominal exchange rates and how these relate to the different components of the balance of payments.

To gain an awareness towards fundamental principles in decision-making for international investments

### General Competencies

Taking into consideration the general competences that the degree-holder must acquire (as these appear in the Diploma Supplement and appear below), chose the ones that the course is aiming at.

- Search for, analysis and synthesis of data and information, with the use of the necessary technology
- Adapting to new situations
- Decision-making
- Working independently
- Working in an international environment
- Working in an interdisciplinary environment
- Production of new research ideas
- Project planning and management
- Respect for the natural environment
- Showing social, professional and ethical responsibility and sensitivity to gender issues
- Criticism and self-criticism
- Production of free, creative and inductive thinking
- Others

Students are expected to acquire the following general competencies:

- Employ a range of data sources to evaluate competing explanations of macroeconomic phenomena
- Demonstrate adequate self-management, learning, communication, and problem-solving skills
- Decision-making
- Working independently

### (4) MODULE OUTLINE

The indicative module outline is as follows:

- International trade and capital flows
- Exchange rates
- Law of one price
- Covered and uncovered interest rate parity
- Managing international risk (hedging and derivatives; translation, operating and transaction exposure)
- International investments
- International portfolio management
- Financing international activities (debt finance, equity finance)

(2) SHORT DESCRIPTION

This course builds on investment theory with an emphasis on establishing appropriate investment objectives, measuring and managing investment risk and return. In this course, different strategies and decisions are discussed which maximize the return by alleviating the risks, if not eliminated. The course provides a practical, hands-on experience in investment management through a portfolio project. The course prepares future portfolio managers for selecting assets, managing risk and constructing optimal portfolios. Case studies will be used to support learning.

(3) LEARNING OUTCOMES

Learning Outcomes

The learning outcomes of the course are described, the specific knowledge, as well as the skills and abilities that students will acquire after the successful completion of the course at the appropriate level.

Consult Appendix A

- Description of the Level of Learning Outcomes for each study cycle according to the European Higher Education Area Qualifications Framework (QF-EHEA)
- Descriptors of Levels 6, 7 & 8 of the European Qualifications Framework for Lifelong Learning and Annex B
- Summary Guide for writing Learning Outcomes

After successful completion of the course, students will be able to:

1. Discuss the role and the purpose of single and multifactor models and how these can be used to portfolio construction.
2. Discuss the development in asset pricing theories for asset allocation.
3. Construct and manage a portfolio of securities, create an investment policy statement matching a client’s portfolio objectives and constraints.
5. Demonstrate knowledge and understanding of the concept and testing of market efficiency.

General Competencies

Taking into consideration the general competences that the degree-holder must acquire (as these appear in the Diploma Supplement and appear below), chose the ones that the course is aiming at.

- Search for, analysis and synthesis of data and information, with the use of the necessary technology
- Adapting to new situations
- Decision-making
- Working independently
- Team work
- Working in an international environment
- Working in an interdisciplinary environment

Students are expected to acquire the following general competencies:

- Critical thinking and problem solving. Our students will have critical thinking and problem solving skills applicable to business and management practice or issues.
- Teamwork. Our graduates will be effective team participants.
- Promotion of free, creative and inductive thinking.
- Communication. Our students will produce oral presentations that communicate complex disciplinary ideas and information effectively for the intended audience and purpose.
- Production of new research ideas.

(4) MODULE OUTLINE

The indicative module outline is as follows:

- The behavior of stock market prices
- The effects of instability on the minimum variance portfolio
- The index models and the CAPM
- The time varying nature of systematic risk
- Multifactor models
- Arbitrage Pricing Theory
- Decomposition of risk and returns
- Tracking and pure factor portfolios
- Hedging strategies
- Testing the market efficiency

(2) SHORT DESCRIPTION

This module builds on the material covered in *Introduction to Econometrics* and further broadens students' knowledge and practical skills of econometrics. The module provides students with the econometric skills needed to successfully investigate economic, financial and accounting relationships by using appropriate methodologies and software. The content covers special issues in linear and discrete choice models and introduces students to time series econometrics and econometrics of panel data. Financial applications will be used to apply knowledge such as the Capital Asset Pricing Model and its multi-factor extensions, herding, efficient market hypothesis, event studies, return spillovers, etc. Case studies will be used to support learning.

(3) LEARNING OUTCOMES

**Learning Outcomes**

The learning outcomes of the course are described, the specific knowledge, as well as the skills and abilities that students will acquire after the successful completion of the course at the appropriate level.

- Description of the Level of Learning Outcomes for each study cycle according to the European Higher Education Area Qualifications Framework (QF-EHEA)
- Descriptors of Levels 6, 7 & 8 of the European Qualifications Framework for Lifelong Learning and Annex B
After successful completion of the course, students will be able to:
1. Engage with the theory and practice of advanced econometric approaches related to cross-sectional, time series, or panel data applications.
2. Interpret the results of econometric analysis.
3. Use appropriate econometric software to undertake the estimation of relationships.
4. Apply appropriate econometric methods to the testing and estimation of relationships.
5. Interpret and assess the findings reported in published research.

General Competencies
Taking into consideration the general competences that the degree-holder must acquire (as these appear in the Diploma Supplement and appear below), chose the ones that the course is aiming at.

- Search for, analysis and synthesis of data and information, with the use of the necessary technology
- Adapting to new situations
- Decision-making
- Working independently
- Team work
- Working in an international environment
- Working in an interdisciplinary environment
- Production of new research ideas
- Project planning and management
- Respect for the natural environment
- Showing social, professional and ethical responsibility and sensitivity to gender issues
- Criticism and self-criticism
- Production of free, creative and inductive thinking
- Others

Students are expected to acquire the following general competencies
- Search for, analysis and synthesis of data and information, with the use of the necessary technology
- Demonstrate adequate self-management, learning, communication, and problem-solving skills
- Decision-making
- Working independently

(4) MODULE OUTLINE
The indicative module outline is as follows:
- Special issues in cross-sectional regression analysis
- Limited dependent variable regression models
- Random walks and unit roots
- ARIMA models
- Cointegration
- VAR models and Granger causality
- ARCH-GARCH models
- Panel data

(5) TEACHING AND LEARNING METHODS - ASSESSMENT

DELIVERY MODE
Face-to-face, Distance Learning

Face-to-face, Distance learning

USE OF INFORMATION AND COMMUNICATIONS TECHNOLOGY
Use of ICT in teaching, laboratory education, communication with students

- Communication and content sharing via Open E-Class
- Use of general software (e.g. Microsoft Office suite)
- Use of specialised econometrics software

TEACHING
Activity | Semester Workload
The way and methods of teaching are described in detail.

Lectures, Seminars, Laboratory Exercise, Field Exercise, Bibliography Study & Analysis, Tutorial, Practice (Placement), Clinical Practice, Artistic Workshop, Interactive teaching, Educational visits, Project preparation, Writing of work / assignments, Artistic creation, etc.

Indicate the student's study hours for each learning activity as well as the hours of self-study in accordance with ECTS principles.

<table>
<thead>
<tr>

**ASSESSMENT**

Description of the assessment process

Assessment Language, Assessment Methods, Formative or Summative, Multiple Choice Test, Short Answer Questions, Essay Development Questions, Problem Solving, Written Assignment, Report/Report, Oral Examination, Public Presentation, Laboratory Paper, Clinical Patient Examination, Artistic Interpretation, Other/Other

Explicitly defined assessment criteria and if and where they are accessible by students are mentioned.

The module assessment language is in English and students are expected to exhibit the required level of proficiency.

The assessment of the course consists of:
- Coursework (45%, group coursework portfolio)
- Final exam (55%, problem solving)

The evaluation criteria across modes of assessment include the following:
- Demonstration of key knowledge related to the content of course
- Demonstration of an ability to apply the knowledge in a given problem or case study
- Critical ability evident in applying appropriate methods/knowledge in a given case and/or developing theory-based and literature based arguments.
- Structure and presentation
- Use of English language

More detailed assessment criteria will be provided to you in the module handbook document or posted on the course webpage, if deemed necessary.

## (2) SHORT DESCRIPTION

This module describes the International Standards on Auditing (ISA) and their main provisions. The course also provides a number of practical application and examples to gain understanding on the implementation of the ISA, as well as, analysis on exercising professional judgement on the application of ISA. Case studies will be used to support learning.

## (3) LEARNING OUTCOMES

### Learning Outcomes

The learning outcomes of the course are described, the specific knowledge, as well as the skills and abilities that students will acquire after the successful completion of the course at the appropriate level.

Consult Appendix A

- Description of the Level of Learning Outcomes for each study cycle according to the European Higher Education Area Qualifications Framework (QF-EHEA)
- Descriptors of Levels 6, 7 & 8 of the European Qualifications Framework for Lifelong Learning and Annex B
- Summary Guide for writing Learning Outcomes

After successful completion of the course, students will be able to:

1. Describe and explain the international regulatory framework of auditing standards.
2. Discuss and apply specified International Standards on Auditing to practical situations.
3. Examine the fundamental requirements of ISAs on a regular basis.

### General Competencies
Taking into consideration the general competences that the degree-holder must acquire (as these appear in the Diploma Supplement and appear below), chose the ones that the course is aiming at:

- Search for, analysis and synthesis of data and information, with the use of the necessary technology
- Adapting to new situations
- Decision-making
- Working independently
- Team work
- Working in an international environment
- Working in an interdisciplinary environment
- Production of new research ideas
- Project planning and management
- Respect for difference and multiculturalism
- Showing social, professional and ethical responsibility and sensitivity to gender issues
- Criticism and self-criticism
- Production of free, creative and inductive thinking
- Others

Students are expected to acquire the following general competencies:

- Decision-making
- Working in an international environment
- Work independently as well as in teams
- Working in an interdisciplinary environment

(4) MODULE OUTLINE

The indicative module outline is as follows:

- The nature and operations of the ISAs.
- ISA 200, 210, 220, 230.
- ISA 240, 250, 260, 265.
- ISA 300, 315, 320, 330.
- ISA 402, 450.
- ISA 500, 501.
- ISA 505, 510, 520, 530.
- ISA 540, 550, 560, 570.
- ISA 580, 600, 610, 620.
- ISA 700, 705.
- ISA 706, 710, 720.
- ISA 800, 805, 810.
- Current developments in ISA.

## (2) SHORT DESCRIPTION

This module aims to provide an analysis of tax accounting. It includes taxation of physical and legal entities along with special cases of taxation such as special contributions. Moreover, the course extends to social insurance contributions and topics relating to Value Added tax (VAT). Case studies will be used to support learning.

## (3) LEARNING OUTCOMES

### Learning Outcomes

The learning outcomes of the course are described, the specific knowledge, as well as the skills and abilities that students will acquire after the successful completion of the course at the appropriate level.

Consult Appendix A

- Description of the Level of Learning Outcomes for each study cycle according to the European Higher Education Area Qualifications Framework (QF-EHEA)
- Descriptors of Levels 6, 7 & 8 of the European Qualifications Framework for Lifelong Learning and Annex B
- Summary Guide for writing Learning Outcomes

After successful completion of the course, students will be able to:

1. Discuss the operation and scope of a tax system.
2. Explain and compute the income tax liabilities of individuals as well as the corporate tax liabilities of groups of companies.
3. Understand and compute the capital gains tax liabilities of individuals and companies.
4. Explain and compute the effect of social insurance contributions on employees, employers and the self-employed.
5. Understand and compute the effects of value added tax on incorporated and unincorporated businesses.
6. Identify and explain the obligations of tax payers and/or agents and the implications of non-compliance.

**General Competencies**

Taking into consideration the general competences that the degree-holder must acquire (as these appear in the Diploma Supplement and appear below), chose the ones that the course is aiming at.

| Search for, analysis and synthesis of data and information, with the use of the necessary technology | Project planning and management |
| Decision-making | Respect for difference and multiculturalism |
| Adapting to new situations | Respect for the natural environment |
| Working independently | Showing social, professional and ethical responsibility and sensitivity to gender issues |
| Team work | Criticism and self-criticism |
| Working in an international environment | Production of free, creative and inductive thinking |
| Working in an interdisciplinary environment | Others |
| Production of new research ideas |

Students are expected to acquire the following general competencies:

- Decision-making
- Working in an international environment
- Work independently as well as in teams
- Adapting to new situations

**MODULE OUTLINE**

The indicative module outline is as follows:

- Greek tax system: The overall function and purpose of taxation in a modern economy.
- Taxation of physical entities, Income tax, income from employment, self-employment, pensions and investment income, computation of income tax liabilities and taxable income, the use of exemptions and reliefs in deferring and minimizing income tax liabilities.
- Corporate tax and taxation of legal entities, profits charged to corporate tax, computation of corporate tax liabilities, the effect of a group on the corporation tax liability, the use of exemptions and reliefs in deferring and minimizing corporation tax liabilities.
- Taxation of capital gains, computation of tax payable stemming from capital gains (individuals and companies),
- Exemptions and reliefs in deferring and minimizing capital gains tax liabilities, gains and losses from disposal of immovable property.
- Gains and losses from the disposal of shares.
- Social insurance contributions, (regarding both employees and employers).
- Special contributions, social cohesion fund contribution, the scope of special contributions (i.e. special solidarity contributions, special contributions for the defense), comprehensive computation of special contribution liabilities for individuals and companies, deemed distribution provisions and the comprehensive computation of the tax liability.
- Value Added Tax (VAT), Scope of VAT, Greek Tax System and VAT.
- VAT registration, VAT requirements, VAT liabilities.
- The system for self and temporary assessment and the making of returns, the time limits for the submission of returns, information, objections, claims and payment of tax.
• Penalties for non-compliance.
• Internal Revenue Code, Treasury Interpretations, Judicial Interpretations

## (2) SHORT DESCRIPTION

This course introduces students to ethical reasoning as it applies to the complex world of businesses in a globalized world. Business ethics applies to both employee and employer conduct, conduct on behalf of a business and conduct within a business. We will use ethical framing and ethical theories to examine dilemmas that arise at different stages and phases of business conduct. Topics to be covered likely include: why be ethical?; standards of ethics; stockholder v. stakeholder theory; social responsibility and environmental responsibility. Students will evaluate case studies and practices in order to develop the skills for leading and developing sustainable business models that adhere to a code of behavior influenced by industrial, organizational, national, and international standards. Case studies will be used to support learning.

## (3) LEARNING OUTCOMES

**Learning Outcomes**

The learning outcomes of the course are described, the specific knowledge, as well as the skills and abilities that students will acquire after the successful completion of the course at the appropriate level.

Consult Appendix A

- Description of the Level of Learning Outcomes for each study cycle according to the European Higher Education Area Qualifications Framework (QF-EHEA)
- Descriptors of Levels 6, 7 & 8 of the European Qualifications Framework for Lifelong Learning and Annex B
- Summary Guide for writing Learning Outcomes
After successful completion of the course, students will be able to:

- Develop critical reading and critical analysis skills to ethical decision making.
- Understand the fundamental ethical principles necessary to evaluate and analyze contemporary issues in business ethics.
- Assess the role and responsibility of business in society, both locally and globally.
- Evaluate the components of ESG and apply these to ESG program development.

**General Competencies**

Taking into consideration the general competences that the degree-holder must acquire (as these appear in the Diploma Supplement and appear below), chose the ones that the course is aiming at.

Search for, analysis and synthesis of data and information, with the use of the necessary technology.
Adapting to new situations.
Decision-making.
Working independently.
Team work.
Working in an international environment.
Working in an interdisciplinary environment.
Production of new research ideas.
Project planning and management.
Respect for difference and multiculturalism.
Respect for the natural environment.
Showing social, professional and ethical responsibility and sensitivity to gender issues.
Criticism and self-criticism.
Production of free, creative and inductive thinking.
Others.

Students are expected to acquire the following general competencies:

- Critical thinking and problem solving. Our students will have critical thinking and problem solving skills applicable to business and management practice or issues.
- Teamwork. Our graduates will be effective team participants.
- Promotion of free, creative and inductive thinking.
- Production of new research ideas.

**MODULE OUTLINE**

The indicative module outline is as follows:

- Business ethics
- Defining the agent
- Stakeholder management
- Factors affecting stakeholder relationships and corporate governance
- Corporate governance and stakeholder management risks and benefits
- Analyst considerations in corporate governance and stakeholder management
- ESG considerations for investors
- ESG factors in investment analysis

(2) SHORT DESCRIPTION

This module deals with the products and strategies of International Investment Banks. It includes the description and analysis of the characteristics of the most commonly used financial derivatives such as Futures, Forwards, Swaps and Options relating to commodity markets and stocks. Modern techniques are used to evaluate financial derivatives. Emphasis is placed on how International Investment Banks value and use financial derivatives and how they encourage their clients to use derivative products to implement risk management strategies within corporate applications. Specifically, students will first cover topics related to futures and forward contracts. Then we will study the options and various strategies. Black-Scholes valuation models and Binomial Trees are also an important part of the course. Students will learn the techniques used to value financial derivatives and hedge risk exposure. Case studies will be used to support learning.

(3) LEARNING OUTCOMES

Learning Outcomes

The learning outcomes of the course are described, the specific knowledge, as well as the skills and abilities that students will acquire after the successful completion of the course at the appropriate level.

Consult Appendix A

- Description of the Level of Learning Outcomes for each study cycle according to the European Higher Education Area Qualifications Framework (QF-EHEA)
- Descriptors of Levels 6, 7 & 8 of the European Qualifications Framework for Lifelong Learning and Annex B
- Summary Guide for writing Learning Outcomes

---

110
After successful completion of the course, students will be able to:
1. Understand and evaluate Futures contracts markets, the use of Futures contracts for hedging, and the pricing process for Futures and Forward contracts.
2. They understand and evaluate swaps, options markets, properties of stock option prices as well as the use of options on stock indices.
3. Understand and apply strategies to the process of buying and selling stocks and exercising options.
4. Apply pricing and valuing financial derivatives with binomial trees and the Black-Scholes model as well as developing sensitivity measurements (delta, gamma, vega, theta, etc.).

General Competencies
Taking into consideration the general competences that the degree-holder must acquire (as these appear in the Diploma Supplement and appear below), chose the ones that the course is aiming at.

Search for, analysis and synthesis of data and information, with the use of the necessary technology
Adapting to new situations
Decision-making
Working independently
Team work
Working in an international environment
Working in an interdisciplinary environment
Production of new research ideas

Students are expected to acquire the following general competencies
- Understanding of financial derivatives and derivatives markets.
- Evaluation and pricing of various types of financial derivatives (Futures, Forwards, Swaps and Options).
- Data analysis and decision-making regarding the use of derivative products and the appropriate investment positions in financial derivatives products.
- Sensitivity analysis and identification of optimal positions for hedging risks.
- Strategic application of derivative financial products in the portfolio composition process.
- Group work, literature review and knowledge synthesis through coursework preparation.

(4) MODULE OUTLINE

The indicative module outline is as follows:
- Introduction to Financial Derivatives
- Futures Markets
- Hedging strategies using Futures
- Interest rates
- Determination of Forward and Futures prices
- Swaps
- Option Markets
- Trading strategies involving stock options
- Properties of stock options
- Binomial Trees
- The Black-Scholes-Merton model
## DELIVERY MODE

- Face-to-face, Distance learning

## USE OF INFORMATION AND COMMUNICATIONS TECHNOLOGY

- Communication and content sharing via Open E-Class
- Use of general software (e.g. Microsoft Office suite)

## TEACHING

The way and methods of teaching are described in detail.

- Lectures, Seminars, Laboratory Exercise, Field Exercise, Bibliography Study & Analysis, Tutorial, Practice (Placement), Clinical Practice, Artistic Workshop, Interactive teaching, Educational visits, Project preparation, Writing of work / assignments, Artistic creation, etc.

Indicate the student's study hours for each learning activity as well as the hours of self-study in accordance with ECTS principles.

## ASSESSMENT

### Description of the assessment process

- Assessment Language, Assessment Methods, Formative or Summative, Multiple Choice Test, Short Answer Questions, Essay Development Questions, Problem Solving, Written Assignment, Report/Report, Oral Examination, Public Presentation, Laboratory Paper, Clinical Patient Examination, Artistic Interpretation, Other/Other

Explicitly defined assessment criteria and if and where they are accessible by students are mentioned.

The module assessment language is in English and students are expected to exhibit the required level of proficiency.

The assessment of the course consists of:

- Mid-term exam (20% - multiple choice test)
- Final examination (80% - problem solving)

The evaluation criteria across modes of assessment include the following:

- Demonstration of key knowledge related to the content of course
- Demonstration of an ability to apply the knowledge in a given problem or case study
- Critical ability evident in applying appropriate methods/knowledge in a given case and/or developing theory-based and literature based arguments.
- Structure and presentation
- Use of English language

More detailed assessment criteria will be provided to you in the module handbook document or posted on the course webpage, if deemed necessary.

(2) SHORT DESCRIPTION

This course provides an introduction to methods and tools of business analytics. It covers the data handling and visualization, along with the methods that can be used for data analysis. The epicenter of the course is the use of the results of the analysis in order to provide business reports that facilitate business decisions. Case studies will be used to support learning.

(3) LEARNING OUTCOMES

Learning Outcomes
The learning outcomes of the course are described, the specific knowledge, as well as the skills and abilities that students will acquire after the successful completion of the course at the appropriate level.
Consult Appendix A
- Description of the Level of Learning Outcomes for each study cycle according to the European Higher Education Area Qualifications Framework (QF-EHEA)
- Descriptors of Levels 6, 7 & 8 of the European Qualifications Framework for Lifelong Learning and Annex B
- Summary Guide for writing Learning Outcomes

After successful completion of the course, students will be able to:
1. Handle data from various sources, account for missing and extreme observations.
2. Reduce the size of the data dimension.
3. Visualize the data.
4. Use data clustering analysis.
5. Develop problem solving techniques using appropriate data science methods.
6. Interpret business analytics results and facilitate decision making.

General Competencies
Taking into consideration the general competences that the degree-holder must acquire (as these appear in the Diploma Supplement and appear below), chose the ones that the course is aiming at.

- Search for, analysis and synthesis of data and technology
- Adapting to new situations
- Working independently
- Team work
- Working in an international environment
- Working in an interdisciplinary environment
- Production of new research ideas
- Project planning and management
- Respect for the natural environment
- Showing social, professional and ethical responsibility and sensitivity to gender issues
- Criticism and self-criticism
- Production of free, creative and inductive thinking
- Others

Students are expected to acquire the following general competencies
- Adopting to new situations.
- Decision-making.
- Work independently as well as in teams.
- Production of new research ideas.
- Production of free, creative and inductive thinking.

(4) MODULE OUTLINE
The indicative module outline is as follows:
- Introduction to business analytics.
- Use of data handling techniques, Data sampling.
- Data retrieval and preprocessing, Big data analysis.
- Visualization of data and Descriptive Statistics.
- Preliminary analysis and correlation analysis.
- Clustering methods.
- Unsupervised learning.
- An introduction to Regression Analysis.
- Advanced Regression Analysis.
- Artificial Intelligence methods, Machine learning.
- Simultaneous analysis, Network Analysis.
- Textual Analysis.
- Data analysis report writing.

**ASSESSMENT**

Description of the assessment process

Assessment Language, Assessment Methods, Formative or Summative, Multiple Choice Test, Short Answer Questions, Essay Development Questions, Problem Solving, Written Assignment, Report/Report, Oral Examination, Public Presentation, Laboratory Paper, Clinical Patient Examination, Artistic Interpretation, Other/Other

Explicitly defined assessment criteria and if and where they are accessible by students are mentioned.

The module assessment language is in English and students are expected to exhibit the required level of proficiency.

The assessment of the course consists of:
- Coursework (40%, written report)
- Final examination (60%, problem solving)

The evaluation criteria across modes of assessment include the following:
- Demonstration of key knowledge related to the content of course
- Demonstration of an ability to apply the knowledge in a given problem or case study
- Critical ability evident in applying appropriate methods/knowledge in a given case and/or developing theory-based and literature based arguments.
- Structure and presentation
- Use of English language

More detailed assessment criteria will be provided to you in the module handbook document or posted on the course webpage, if deemed necessary.

(2) SHORT DESCRIPTION

The aim of this course is to provide an in-depth analysis of various risk management issues and examine certain internal auditing topics. In particular, the course offers a thorough evaluation of risk categories including, interest rate risk, credit risk, liquidity risk, capital risk, fraud risk and market risk. Moreover, the course provides an in-depth analysis of the internal control system and procedures, as well as the risk management procedures. Case studies will be used to support learning.

(3) LEARNING OUTCOMES

Learning Outcomes

The learning outcomes of the course are described, the specific knowledge, as well as the skills and abilities that students will acquire after the successful completion of the course at the appropriate level.

Consult Appendix A

- Description of the Level of Learning Outcomes for each study cycle according to the European Higher Education Area Qualifications Framework (QF-EHEA)
- Descriptors of Levels 6, 7 & 8 of the European Qualifications Framework for Lifelong Learning and Annex B
- Summary Guide for writing Learning Outcomes

After successful completion of the course, students will be able to:

1. Explain the nature of internal audit and describe its role as part of overall performance management and its relationship with the external audit.
2. Describe and evaluate information systems and internal controls to identify and communicate control risks and their potential consequences making appropriate recommendations.
3. Identify and describe the work and evidence required to meet the objectives of audit engagements and the application of the International Standards on Auditing (ISA).
4. Recognize the legal and regulatory environment and its impact on audit and assurance practice.
5. Assess the various forms of risk and develop risk management mechanisms.

**General Competencies**

Taking into consideration the general competences that the degree-holder must acquire (as these appear in the Diploma Supplement and appear below), chose the ones that the course is aiming at.

<table>

Students are expected to acquire the following general competencies

- Decision-making.
- Working in an international environment.
- Work independently as well as in teams.
- Adapting to new situations.

**(4) MODULE OUTLINE**

The indicative module outline is as follows:

- Introduction to Internal Control and Risk management: Scope and importance, Systems of internal control.
- Internal Control of Accounts of the Statement of Financial Position.
- Internal Control of Accounts of the Income Statement.
- Audit Sampling, Tests of control.
- Audit Evidence.
- Risk and Control, Evaluation of the Internal Control system.
- Credit risk analysis – credit ratings.
- Liquidity risk management.
- Market risk.
- Value at risk.
- Communication in an internal control system.
- Internal control and risk management in financial institutions, Government policies and global banking supervision, Basel accord and capital adequacy planning.
- Building and implementing a successful internal control system.

(2) SHORT DESCRIPTION

The course provides an in-depth analysis of advanced methodologies used in managerial accounting for decision making and strategic decision making. The course is structured along budget procedures and analysis of various variances, as well as, business valuation and pricing methods. Moreover, the course provides a number of methods to analyze decisions relating to transfer pricing. Case studies will be used to support learning.

(3) LEARNING OUTCOMES

Learning Outcomes

The learning outcomes of the course are described, the specific knowledge, as well as the skills and abilities that students will acquire after the successful completion of the course at the appropriate level.

Consult Appendix A

- Description of the Level of Learning Outcomes for each study cycle according to the European Higher Education Area Qualifications Framework (QF-EHEA)
- Descriptors of Levels 6, 7 & 8 of the European Qualifications Framework for Lifelong Learning and Annex B Summary Guide for writing Learning Outcomes

After successful completion of the course, students will be able to:

1. Use advanced methods of Managerial Accounting for decision taking.
2. Prepare a full budget.
3. Use standard cost techniques to take decisions regarding productions costs.
4. Prepare Pro-Forma Financial Statements.

**General Competencies**

Taking into consideration the general competences that the degree-holder must acquire (as these appear in the Diploma Supplement and appear below), choose the ones that the course is aiming at.

- Search for, analysis and synthesis of data and technology
- Adapting to new situations
- Decision-making
- Working independently
- Team work
- Working in an international environment
- Working in an interdisciplinary environment
- Production of new research ideas
- Project planning and management
- Respect for difference and multiculturalism
- Respect for the natural environment
- Showing social, professional and ethical responsibility and sensitivity to gender issues
- Criticism and self-criticism
- Production of free, creative and inductive thinking
- Others

Students are expected to acquire the following general competencies:

- Adopting to new situations.
- Search for, analysis and synthesis of data and information, with the use of the necessary technology.
- Decision-making.
- Work independently as well as in teams.
- Working in an interdisciplinary environment.

**MODULE OUTLINE**

The indicative module outline is as follows:

- Accounting for Management and Control.
- Uncertainty and Risk in Decision Making.
- Budgeting Framework, Systems of Budgets, Pro-Forma Financial Statements
- The Budgeting Process.
- Budgeting and Quantitative and Performance Analysis, Planning and associated variances.
- Material Mix and associated variances, Sales Mix and associated variances.
- Capital Budgeting.
- Standard Costing and Variance Analysis.
- Balanced Scorecard and Key Performance Indicators.
- Pricing.
- Decentralized Entities and Transfer Pricing.
- Analysis of Business Performance.
- Performance Measurement in Private Entities, not-for-profit and public sector entities.

(2) SHORT DESCRIPTION

This module examines the key risks of financial institutions (market, credit, liquidity, pre-payment risks) and the importance of Asset-Liability management. Students will be exposed to key trends and changes that take place in the banking sector, the current problems confronting managers in banking, and become familiar with the various career opportunities in the industry. Case studies will be used to support learning.

(3) LEARNING OUTCOMES

Learning Outcomes

The learning outcomes of the course are described, the specific knowledge, as well as the skills and abilities that students will acquire after the successful completion of the course at the appropriate level.

Consult Appendix A

- Description of the Level of Learning Outcomes for each study cycle according to the European Higher Education Area Qualifications Framework (QF-EHEA)
- Descriptors of Levels 6, 7 & 8 of the European Qualifications Framework for Lifelong Learning and Annex B
- Summary Guide for writing Learning Outcomes

After successful completion of the course, students will be able to:

1. Critically evaluate the role of financial institutions in the economy, their structure, and the regulatory environment in which they operate, as well as the implication of regulations in the structure of capital.
2. Discuss the analytical foundations related to the asset-liability management (ALM) of financial institutions, the risks involved, and the impact on the valuation of financial institutions.
3. Analyse and evaluate the management of the lending, investment, and trading activities of financial institutions, the related risks and the management of these risks. Understand the role and the risks of off-balance sheet activities.
4. Assess the role of capital in financial institutions and the importance of capital management.

General Competencies
Taking into consideration the general competences that the degree-holder must acquire (as these appear in the Diploma Supplement and appear below), chose the ones that the course is aiming at.

| Search for, analysis and synthesis of data and technology | Project planning and management |
| Adapting to new situations | Respect for difference and multiculturalism |
| Decision-making | Respect for the natural environment |
| Working independently | Sensitivity to gender issues |
| Team work | Criticism and self-criticism |
| Working in an international environment | Production of free, creative and inductive thinking |
| Working in an interdisciplinary environment | Others |
| Production of new research ideas |

Students are expected to acquire the following general competencies
- Work independently
- Decision-making
- Search for, analysis and synthesis of data and information, with the use of the necessary technology
- Promotion of free, creative, critical and inductive thinking

(4) MODULE OUTLINE

The indicative module outline is as follows:
- What Is Special About Banks
- Bank Activities and Services
- Types of Banking
- International Banking
- Central Banking and bank regulation
- Bank’s Balance Sheet and Income Structure
- Bank Financial Management
- Banking Risks
- Bank Risk Management
- Investment Banking

(2) SHORT DESCRIPTION

This module attempts to provide a complete framework for corporate risk management. In particular it focuses in financial risk management and on the quantification of financial risk through VaR. First, the relevant mathematical and statistical background is presented. Next, subjects such as the definition of VaR, parametric estimation of VaR, estimation of VaR with Monte-Carlo simulation and historical simulation, VaR of portfolio and specific positions in shares, etc., model adequacy check and stress testing are discussed. In addition, it examines the management of cyber risks to which businesses are increasingly exposed. In the context of managing these risks, the relevant definitions, their classification, the relevant institutional framework, their evaluation and valuation methods are provided. Case studies will be used to support learning.

(3) LEARNING OUTCOMES

Learning Outcomes
The learning outcomes of the course are described, the specific knowledge, as well as the skills and abilities that students will acquire after the successful completion of the course at the appropriate level.
Consult Appendix A
- Description of the Level of Learning Outcomes for each study cycle according to the European Higher Education Area Qualifications Framework (QF-EHEA)
- Descriptors of Levels 6, 7 & 8 of the European Qualifications Framework for Lifelong Learning and Annex B
- Summary Guide for writing Learning Outcomes
After successful completion of the course, students will be able to:
1. Apply mathematical tools in financial risk analysis management and will be able to apply their risk management knowledge in real life
2. Discuss the main markets and different risk measures
3. Apply financial models and formulae to evaluate alternative investment and financing decisions.

**General Competencies**

Taking into consideration the general competences that the degree-holder must acquire (as these appear in the Diploma Supplement and appear below), chose the ones that the course is aiming at.

| Search for, analysis and synthesis of data and information, with the use of the necessary technology | Project planning and management |
| Adapting to new situations | Respect for difference and multiculturalism |
| Decision-making | Respect for the natural environment |
| Working independently | Sensitivity to gender issues |
| Team work | Criticism and self-criticism |
| Working in an international environment | Production of free, creative and inductive thinking |
| Working in an interdisciplinary environment | Others |
| Production of new research ideas | |

Students are expected to acquire the following general competencies
- Work independently
- Decision-making
- Search for, analysis and synthesis of data and information, with the use of the necessary technology
- Promotion of free, creative, critical and inductive thinking

**MODULE OUTLINE**

The indicative module outline is as follows:
- The Modern Risk Management Framework
- Types of Risks
- Statistical Background
- Modelling Financial Time-Series and Returns
- Value-at-Risk
- Parametric Estimation of VaR
- Estimating VaR when Correlation and Variance are Functions of Time
- Market Risks and VaR
- Non-Linear Returns
- Monte Carlo Simulations

ASSESSMENT

Description of the assessment process

Assessment Language, Assessment Methods, Formative or Summative, Multiple Choice Test, Short Answer Questions, Essay Development Questions, Problem Solving, Written Assignment, Report/Report, Oral Examination, Public Presentation, Laboratory Paper, Clinical Patient Examination, Artistic Interpretation, Other/Other

Explicitly defined assessment criteria and if and where they are accessible by students are mentioned.

The module assessment language is in English and students are expected to exhibit the required level of proficiency.

The assessment of the course consists of:

- Mid-term exam (20% - multiple choice test)
- Final examination (80% - problem solving)

The evaluation criteria across modes of assessment include the following:

- Demonstration of key knowledge related to the content of course
- Demonstration of an ability to apply the knowledge in a given problem or case study
- Critical ability evident in applying appropriate methods/knowledge in a given case and/or developing theory-based and literature based arguments.
- Structure and presentation
- Use of English language

More detailed assessment criteria will be provided to you in the module handbook document or posted on the course webpage, if deemed necessary.

(2) SHORT DESCRIPTION

The aim of this course is to enable students to understand the concept and purpose of consolidated financial statements and reporting within the context of contemporary accounting theory and practice. This module explains all the major conceptual issues pertaining to consolidations, discusses the preparation of consolidated financial statements, presents the basic reporting standards for consolidation and analyses the nature and reporting of intercompany transactions. Case studies will be used to support learning.

(3) LEARNING OUTCOMES

Learning Outcomes
The learning outcomes of the course are described, the specific knowledge, as well as the skills and abilities that students will acquire after the successful completion of the course at the appropriate level.
Consult Appendix A
- Description of the Level of Learning Outcomes for each study cycle according to the European Higher Education Area Qualifications Framework (QF-EHEA)
- Descriptors of Levels 6, 7 & 8 of the European Qualifications Framework for Lifelong Learning and Annex B
- Summary Guide for writing Learning Outcomes

After successful completion of the course, students will be able to:
1. Explain the context and purpose of financial reporting and define the quantitative characteristics of financial information.
2. Describe business combination methods.
3. Explain the fundamental concepts and terms of consolidated financial statements.
4. Prepare consolidated financial statements for more periods, applying different methods and procedures.
5. Evaluate any presented consolidated financial statements.

General Competencies
Taking into consideration the general competences that the degree-holder must acquire (as these appear in the Diploma Supplement and appear below), chose the ones that the course is aiming at.

| Search for, analysis and synthesis of data and technology | Project planning and management |
| Adapting to new situations | Respect for the natural environment |
| Decision-making | Sensitivity to gender issues |
| Working independently | Criticism and self-criticism |
| Team work | Production of free, creative and inductive thinking |
| Working in an international environment | Others |
| Working in an interdisciplinary environment | Production of new research ideas |

Students are expected to acquire the following general competencies
- Adopting to new situations.
- Search for, analysis and synthesis of data and information, with the use of the necessary technology.
- Decision-making.
- Work independently as well as in teams.
- Working in an interdisciplinary environment.

(4) MODULE OUTLINE
The indicative module outline is as follows:
- Introduction to Consolidated Financial Statements and Group Accounting.
- Fundamentals of Consolidated Financial Statements.
- Accounting for Business Combinations.
- Consolidation Methods and Procedures I – Preparation of Consolidated Accounting Statements.
- Consolidation Methods and Procedures II – Goodwill, Non-Controlling Interest, Accounting for other Reserves, Fair Value Adjustments.
- The Equity Method.
- Consolidation after the Acquisition Date, Pre and Post Acquisition Profits.
- Intercompany Transactions I.
- Intercompany Transactions II.
- Changes in Ownership, Disposal of a Subsidiary.
- Mutual and Indirect Holdings.
- Preparation of Consolidated Financial Statements.
- Consolidated Accounting Statements and Accounting Standards.

(5) TEACHING AND LEARNING METHODS - ASSESSMENT
DELIVERY MODE
Face-to-face, Distance Learning.

USE OF INFORMATION AND COMMUNICATIONS TECHNOLOGY
- Communication and content sharing via Open E-Class
- Use of general software (e.g. Microsoft Office suite)
Use of ICT in teaching, laboratory education, communication with students

(2) SHORT DESCRIPTION

The objective of this course is to provide students with an advanced analysis of topics of financial accounting. The course analyses the context and purpose of financial accounting in banks, as well as, the accounting treatment of leasing, sales and leaseback, factoring, joint ventures, securitization, financial instruments, hedging accounting and offshore companies.

(3) LEARNING OUTCOMES

Learning Outcomes
The learning outcomes of the course are described, the specific knowledge, as well as the skills and abilities that students will acquire after the successful completion of the course at the appropriate level. Consult Appendix A

□ Description of the Level of Learning Outcomes for each study cycle according to the European Higher Education Area Qualifications Framework (QF-EHEA)
□ Descriptors of Levels 6, 7 & 8 of the European Qualifications Framework for Lifelong Learning and Annex B
□ Summary Guide for writing Learning Outcomes

After successful completion of the course, students will be able to:
1. Address special issues in financial accounting.
2. Use accounting judgment to take decisions regarding special issues in financial accounting.
3. Account for special forms of financing including leasing and factoring.
4. Account for financial assets.
5. Account for hedge accounting.

**General Competencies**

Taking into consideration the general competences that the degree-holder must acquire (as these appear in the Diploma Supplement and appear below), choose the ones that the course is aiming at.

- Search for, analysis and synthesis of data and technology
- Adapting to new situations
- Decision-making
- Working independently
- Team work
- Working in an international environment
- Working in an interdisciplinary environment
- Production of new research ideas
- Project planning and management
- Respect for difference and multiculturalism
- Respect for the natural environment
- Showing social, professional and ethical responsibility and sensitivity to gender issues
- Criticism and self-criticism
- Production of free, creative and inductive thinking
- Others

Students are expected to acquire the following general competencies

- Adopting to new situations.
- Decision-making.
- Work independently as well as in teams.
- Working in an international environment.

(4) **MODULE OUTLINE**

The indicative module outline is as follows:

- Introduction to Contemporary Issues in Financial Accounting.
- Banking Accounting.
- Preparation and Interpretation of the Cash Flow Statements.
- Accounting for Leasing.
- Accounting for Factoring.
- Accounting for Offshore Companies.
- Accounting for Financial Assets.
- Securitization.
- Hedge Accounting.
- Accounting for Crypto Assets.
- Special Corporate Forms Accounting.
- Accounting for Government Grants.
- Accounting for Bonds.

(2) SHORT DESCRIPTION

The objective of this module is to enrich the financial knowledge of students through a series of lectures using case studies on specific contemporary financial topics. The topics covered are: MBS and ABS markets, Alternative investments, Real estate, Environmental risk and ESG, social and economic networks, weather derivatives and others.

(3) LEARNING OUTCOMES

Learning Outcomes
The learning outcomes of the course are described, the specific knowledge, as well as the skills and abilities that students will acquire after the successful completion of the course at the appropriate level.

Consult Appendix A
- Description of the Level of Learning Outcomes for each study cycle according to the European Higher Education Area Qualifications Framework (QF-EHEA)
- Descriptors of Levels 6, 7 & 8 of the European Qualifications Framework for Lifelong Learning and Annex B
- Summary Guide for writing Learning Outcomes

After successful completion of the course, students will be able to:
1. Review key concepts relating to contemporary issues in the field of finance.
2. Examine relevant regulatory frameworks and ethical considerations applicable to contemporary issues in finance.
3. Critically review various industry reports and evaluate the nature and importance of a selected contemporary issue in finance.
4. Critically analyse academic research papers examining the empirical works and theory in the selected contemporary issue.
5. Compose a report to communicate findings from the analysis of industry and academic evidence on the selected contemporary issue.

General Competencies
Taking into consideration the general competences that the degree-holder must acquire (as these appear in the Diploma Supplement and appear below), chose the ones that the course is aiming at.

- Search for, analysis and synthesis of data and information, with the use of the necessary technology

(2) SHORT DESCRIPTION

The world of fixed-income markets is becoming increasingly more complex with debt instruments that have varied payoffs structures and fixed-income derivatives that are growing in size and complexity. As a result of the 2007-2008 global financial crisis many key players in the fixed-income markets either collapsed (Bears Stearns and Lehman Brothers), or were bailed out by governments (Freddie Mac, Fannie Mae, the Royal Bank of Scotland, Lloyds TSB, and HBOS, etc.). Hence, the aim of this module is to provide an introduction of the complex nature of fixed-income markets and securities and a discussion on the forces affecting prices and risks of such instruments. The module will also include a discussion on the appropriate management techniques to hedge the risks associated with fixed-income instruments.

(3) LEARNING OUTCOMES

Learning Outcomes
The learning outcomes of the course are described, the specific knowledge, as well as the skills and abilities that students will acquire after the successful completion of the course at the appropriate level.

Consult Appendix A

- Description of the Level of Learning Outcomes for each study cycle according to the European Higher Education Area Qualifications Framework (QF-EHEA)
- Descriptors of Levels 6, 7 & 8 of the European Qualifications Framework for Lifelong Learning and Annex B
- Summary Guide for writing Learning Outcomes

After successful completion of the course, students will be able to:
1. Demonstrate a systematic understanding of the operations in money and bond markets and appraise the more recent developments in these markets.
2. Critically assess the similarities and differences among key debt instruments and examine the risks associated with each category of bond investments.
3. Critically review the underlying theories of interest rate term structure.
4. Apply the appropriate methods and techniques to value bond instruments.
5. Structure and manage a diversified fixed-income portfolio.

General Competencies
Taking into consideration the general competences that the degree-holder must acquire (as these appear in the Diploma Supplement and appear below), chose the ones that the course is aiming at.

- Search for, analysis and synthesis of data and information, with the use of the necessary technology
- Adapting to new situations
- Decision-making
- Working independently
- Team work
- Working in an international environment
- Working in an interdisciplinary environment
- Production of new research ideas
- Project planning and management
- Respect for difference and multiculturalism
- Respect for the natural environment
- Showing social, professional and ethical responsibility and sensitivity to gender issues
- Criticism and self-criticism
- Production of free, creative and inductive thinking
- Others

Students are expected to acquire the following general competencies:

- Work independently
- Decision-making
- Search for, analysis and synthesis of data and information, with the use of the necessary technology
- Promotion of free, creative, critical and inductive thinking

(4) MODULE OUTLINE

The indicative module outline is as follows:

- Features of debt instruments and risks associated with investing in these instruments
- Debt and money markets (participants, operations, trading activities)
- Fixed-income instruments (Government bonds, corporate bonds, credit ratings, high-yield bonds, international bonds, mortgage-backed securities, etc.)
- Money market instruments (Treasury bills, commercial paper, repurchase agreements, bills of exchange, etc.)
- Fixed-income valuation
- Term-structure of interest rates and classic theories of term structure, derivation of zero-coupon yield curve
- General principles of credit analysis (credit scoring, credit risk modelling, etc.)
- Fixed-income portfolio construction and management strategies (portfolio’s risk profile, managing funds against a bond market index).
- Convertible Bonds
- Bonds with embedded options

(2) SHORT DESCRIPTION

This is a two-semester course where students are required to either undertake a research project on a topic of their choice or deliver an industrial dissertation provided that certain conditions are met with regards to the host organization. A supervisor will guide students throughout their dissertation while generic guidance will be provided to help students identify a suitable topic, prepare a literature review, choose an appropriate methodological approach and structuring their dissertation. Case studies will be used to support learning.

(3) LEARNING OUTCOMES

Learning Outcomes

The learning outcomes of the course are described, the specific knowledge, as well as the skills and abilities that students will acquire after the successful completion of the course at the appropriate level.

Consult Appendix A

- Description of the Level of Learning Outcomes for each study cycle according to the European Higher Education Area Qualifications Framework (QF-EHEA)
- Descriptors of Levels 6, 7 & 8 of the European Qualifications Framework for Lifelong Learning and Annex B
- Summary Guide for writing Learning Outcomes

After successful completion of the course, students will be able to:

1. Demonstrate a critical understanding of the literature relevant to their chosen research topic.
2. Demonstrate a critical understanding of the methodological approaches relevant to their chosen topic.
3. Apply an appropriate methodology to a piece of individual research.
4. Interpret and present the results of their research.

General Competencies
Taking into consideration the general competences that the degree-holder must acquire (as these appear in the Diploma Supplement and appear below), chose the ones that the course is aiming at.

Search for, analysis and synthesis of data and information, with the use of the necessary technology
Adapting to new situations
Decision-making
Working independently
Team work
Working in an international environment
Working in an interdisciplinary environment
Production of new research ideas
Project planning and management
Respect for difference and multiculturalism
Respect for the natural environment
Showing social, professional and ethical responsibility and sensitivity
criticism
Adapting to new situations
Decision-making
Working independently
Team work
Working in an international environment
Working in an interdisciplinary environment
Production of new research ideas
Project planning and management
Respect for difference and multiculturalism
Respect for the natural environment
Showing social, professional and ethical responsibility and sensitivity
criticism
Adapting to new situations
Decision-making
Working independently
Team work
Working in an international environment
Working in an interdisciplinary environment
Production of new research ideas

Students are expected to acquire the following general competencies:
- Decision-making
- Working independently
- Production of new research ideas
- Search for, analysis and synthesis of data and information, with the use of the necessary technology

(4) MODULE OUTLINE

The module extends over two semesters where students are required to undertake an individual research project or industrial dissertation. During the first semester, students will be expected to prepare a research proposal, which will include a review of the literature. Similarly, for the industrial dissertation students should identify a firm and a problem that the firm is keen for the student to deal with and come up with a plan. In the second semester, students will complete their dissertation, building on their proposal. A small number of introductory lectures may be delivered at the beginning of the module in order to:
- Introduce students to the principles of conducting a research project
- Explain how a literature review is conducted and structured
- Discuss principles of identifying and implementing an appropriate methodological approach
- Discuss issues related to structuring the research project, dealing with sensitive information, plagiarism, etc.

Students will be assigned with a supervisor who will be able to provide guidance throughout the project. The dissertation entails mainly self-study time and it is expected that students will engage in self-learning on issues outside the BSc programme curriculum and specific to their chosen project.

(5) TEACHING AND LEARNING METHODS - ASSESSMENT

<table>
<thead>
<tr>
<th>DELIVERY MODE</th>
<th>Face-to-face, Distance Learning</th>
</tr>
</thead>
<tbody>
<tr>
<td>USE OF INFORMATION AND COMMUNICATIONS TECHNOLOGY</td>
<td>Communication and content sharing via Open E-Class</td>
</tr>
<tr>
<td></td>
<td>Use of general software (e.g. Microsoft Office suite)</td>
</tr>
</tbody>
</table>
### TEACHING

The way and methods of teaching are described in detail.

- Lectures, Seminars, Laboratory Exercise, Field Exercise, Bibliography Study & Analysis, Tutorial, Practice (Placement), Clinical Practice, Artistic Workshop, Interactive teaching, Educational visits, Project preparation, Writing of work / assignments, Artistic creation, etc.

Indicate the student's study hours for each learning activity as well as the hours of self-study in accordance with ECTS principles.

#### Activity | Semester Workload [1 ECTS = 28 hours]
---|---
Lectures | 9 hours
Tutorials / Seminars | 5 hours
Laboratory / Clinical Practice | 
Coursework preparation | 52 hours
Bibliographic research | 120 hours
Field trips / field work | 
Practice / placement | 
Self-study | 150 hours

Total | 336 hours

### ASSESSMENT

**Description of the assessment process**

- Assessment Language, Assessment Methods, Formative or Summative, Multiple Choice Test, Short Answer Questions, Essay Development Questions, Problem Solving, Written Assignment, Report/Report, Oral Examination, Public Presentation, Laboratory Paper, Clinical Patient Examination, Artistic Interpretation, Other/Other

Explicitly defined assessment criteria and if and where they are accessible by students are mentioned.

The module assessment language is in English and students are expected to exhibit the required level of proficiency.

The assessment of the course consists of:
- Dissertation (100% - research project)

The evaluation criteria across modes of assessment include the following:
- Demonstration of key knowledge related to the content of course
- Demonstration of an ability to apply the knowledge in a given problem or case study
- Critical ability evident in applying appropriate methods/knowledge in a given case and/or developing theory-based and literature based arguments.
- Structure and presentation
- Use of English language

More detailed assessment criteria will be provided to you in the module handbook document or posted on the course webpage, if deemed necessary.

### (6) SUGGESTED BIBLIOGRAPHY

Other library sources, including journal articles accessible through the Library, as assigned by the instructor.
